the 2011 subsequent arrangement, the United States approved the cutting and de-cladding of the HEU for conversion and downblending to approximately 18% at the Japan Atomic Energy Agency (JAEA) Plutonium Fuel Fabrication Facility, and the temporary storage of the downblended HEU at the JAEA Tokai Plutonium Fuel Production Facility. The downblended HEU was planned for use as fuel for the JAEA experimental fast reactor JOYO. Under the revised plan, the HEU will be cut into segments and de-cladded, then packaged for return to the United States.

Pursuant to the authority in section 131a. of the Atomic Energy Act of 1954, as delegated, I have determined that this proposed subsequent arrangement will not be inimical to the common defense and security of the United States of America.
