The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The Alabama Power Company (licensee) requests Commission approval to extend its temporary variance from the normal reservoir elevations for the Thurlow impoundment as required by Article 402 of the license in order to replace the existing automatic spillway crest gates with Obermeyer gates at the project's Thurlow Dam. Article 402 requires, in part, the licensee to operate the project so the maximum drawdown at the Thurlow impoundment does not exceed 1 foot below the normal pool elevation of 288.7 feet mean sea level (msl). In an order issued June 12, 2018, the Commission approved a variance of 10 feet from the elevation requirements of Article 402, for the period of June 1, 2019 through October 31, 2019 so that the licensee could perform the work. In its current request, the licensee asks that the variance period be extended to May 1, 2019 through December 31, 2019. The licensee is requesting the extension because of potential delays caused by weather, longer than anticipated installation times, and as an alternative to having the work continue into another construction season.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE, Room 2A, Washington, DC 20426, or by calling (202) 502-8371.
