Abstract

Markup Application is the name of the USGS National Geospatial Technical Operations Center project that allows citizen participation in volunteer map data collection activities for hydrography datasets.

The USGS manages the National Hydrography Dataset (NHD), Watershed Boundary Dataset (WBD), and National Hydrography Dataset Plus High Resolution (NHDPlus HR). All three hydrography datasets include user-driven data provided by state stewards or USGS trained editors. The USGS also provides an editing tool, offers technical support, and distributes authoritative hydrography data to the public as part of The National Map.

Markup Application allows citizens to submit proposed changes and corrections, called “markups,” to NHD, WBD, or NHDPlus HR by drawing newly proposed features on the map or by filling out a form that explains a suggested change for a selected feature. All submitted markups, along with the user email contact, are saved in a database to be reviewed by NHD or WBD state stewards, or USGS staff, for validation. State stewards or USGS staff may contact the data volunteer via the recorded email address if further clarification is needed for a proposed change. Validated markups go in a queue of edits to be incorporated into the NHD or WBD. The edits are made by NHD or WBD state stewards or USGS editors using established editing tools. No edits to the hydrography datasets take place within the Markup Application.
