

SUMMARY OF ANNUAL BURDEN—Continued

Information collection (IC) description	Type of burden	Obligation to respond	Estimated number of respondents	Estimated number of responses	Estimated time per response (hours)	Frequency of response	Total estimated annual burden (hours)
Total Estimated Annual Burden Hours	144

General Description of Collection: The FDIC’s policy statement on Qualifications for Failed Bank Acquisitions provides guidance to private capital investors interested in acquiring or investing in failed insured depository institutions regarding the terms and conditions for such investments or acquisitions. The information collected pursuant to the policy statement allows the FDIC to evaluate, among other things, whether such investors (and their related interests) could negatively impact the Deposit Insurance Fund, increase resolution costs, or operate in a manner that conflict with statutory safety and soundness principles and compliance requirements.

According to data from FDIC Call Reports, there were eight (8) bank failures in 2015, five (5) failures in 2016, eight (8) failures in 2017, and zero bank failures in 2018 and the first five months of 2019. This is an average of fewer than 5 bank failures per year. Based on this recent data, the declining trend in failures, and the improvement in bank financial conditions, the FDIC believes that it is appropriate to reduce the expected number of respondents for Sections D and I from 10 per year to 3 while keeping the expected number of respondents at 3 per year for Section E.

The estimated total number of hours per respondent, per year will remain unchanged at 48 hours. The 48 hours is comprised of 12 monthly reports of two hours each for Section D, four quarterly reports of two hours each for Section E, and four quarterly reports of four hours each for Section I. Thus the total estimated annual burden for the ICR is 144 hours as reflected in the table above. This represents a reduction of 280 hours from the 2016 estimate of 424 hours.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collection of information:

1. *Title:* Funding and Liquidity Risk Management.

OMB Number: 3064–0174.

Form Number: None.

Affected Public: Businesses or other for-profits.

Burden Estimate:

SUMMARY OF ANNUAL BURDEN

Information collection (IC) description	Type of burden	Obligation to respond	Estimated number of respondents	Estimated number of responses	Estimated time per response (hours)	Frequency of response	Total estimated annual burden (hours)
Par. 14—Strategies, Policies, Procedures and Risk Tolerances.	Recordkeeping	Voluntary	3,483	1	96.42	On Occasion ...	335,830.86
Par. 20—Liquidity Risk Management, Measurement, Monitoring and Reporting.	Reporting	Voluntary	3,483	12	4	On Occasion ...	167,184
Total Estimated Annual Burden Hours	503,014.86 hours

General Description of Collection: The information collection includes reporting and recordkeeping burdens related to sound risk management principles applicable to insured depository institutions. To enable an institution and its supervisor to evaluate the liquidity risk exposure of an institution's individual business lines and for the institution as a whole, the Interagency Policy Statement on Funding and Liquidity Risk Management (Interagency Statement) summarizes principles of sound liquidity risk management and advocates the establishment of policies

and procedures that consider liquidity costs, benefits, and risks in strategic planning. In addition, the Interagency Statement encourages the use of liquidity risk reports that provide detailed and aggregate information on items such as cash flow gaps, cash flow projections, assumptions used in cash flow projections, asset and funding concentrations, funding availability, and early warning or risk indicators. This is intended to enable management to assess an institution's sensitivity to changes in market conditions, the institution's financial performance, and other important risk factors.

There is no change in the method or substance of the collection. The overall reduction in burden hours is the result of economic fluctuation. In particular, the number of respondents has decreased while the hours per response and frequency of responses have remained the same.

2. *Title:* Interagency Guidance on Leveraged Lending.

OMB Number: 3064-0191.

Form Number: None.

Affected Public: Insured state nonmember banks and savings associations.

Burden Estimate:

SUMMARY OF ANNUAL BURDEN

Information collection (IC) description	Type of burden	Obligation to respond	Estimated number of respondents	Estimated number of responses	Estimated time per response (hours)	Frequency of response	Total estimated annual burden (hours)
Interagency Guidance on Leveraged Lending—Implementation.	Recordkeeping	Voluntary	1	1	986.70	On Occasion ...	986.70
Interagency Guidance on Leveraged Lending—Ongoing.	Recordkeeping	Voluntary	5	1	529.3	On Occasion ...	2,646.50
Total Estimated Annual Burden Hours	3,633.20

General Description of Collection: The Interagency Guidance on Leveraged Lending (Guidance) outlines for agency-supervised institutions high-level principles related to safe-and-sound leveraged lending activities, including underwriting considerations, assessing and documenting enterprise value, risk management expectations for credits awaiting distribution, stress-testing expectations, pipeline portfolio management, and risk management expectations for exposures held by the institution. This Guidance provides information to all financial institutions supervised by the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the FDIC (the Agencies) that engage in leveraged lending activities. The number of community banks with substantial involvement in leveraged lending is small; therefore, the Agencies generally expect community banks to be largely unaffected by this information collection.

There is no change in the method or substance of the collection. The overall reduction in burden hours is the result of economic fluctuation. In particular, the number of respondents has decreased while the hours per response and frequency of responses have remained the same.
