SUPPLEMENTARY INFORMATION:

Background

This document contains proposed regulations to Title 26 of the Code of Federal Regulations under section 6041 of the Internal Revenue Code. The proposed regulations would update and simplify the existing information reporting requirements under § 7.6041–1 of the Temporary Income Tax Regulations under the Tax Reform Act of 1976 for persons who make reportable payments of bingo, keno, or slot machine winnings. The updated requirements are proposed to be set forth in a new § 1.6041–10 of the regulations. Accordingly, when § 1.6041–10 of the proposed regulations becomes final, the regulations under § 7.6041–1 will be removed.

Section 6041 generally requires information reporting by every person engaged in a trade or business who, in the course of such trade or business, makes payments of gross income of $600 or more in any taxable year. The current regulatory reporting thresholds for winnings from bingo, keno, and slot machines deviate from this general rule. Prior to these revisions, the current thresholds in 1977, reporting from bingo, keno, and slot machines was based a sliding scale threshold tied to the amount of the wager and required the wager odds to be at least 300 to 1. On January 7, 1977, temporary regulation § 7.6041–1 was published establishing reporting thresholds for payments of winnings from bingo, keno, and slot machine play in the amount of $600. In Announcement 77–63, 1977–8 IRB 25, the IRS announced that it would not assert penalties for failure to file information returns before May 1, 1977, to allow the casino industry to submit, and the IRS to consider, information regarding the industry’s problems in complying with the reporting requirements. After considering the evidence presented by the casino industry, the IRS announced in a press release that effective May 1, 1977, information reporting to the IRS would be required on payments of winnings of $1,200 or more from a bingo game or a slot machine play, and $1,500 or more from a keno game net of the wager. On June 30, 1977, § 7.6041–1 was amended to raise the reporting thresholds for winnings from a bingo game and slot machine play to $1,200, and the reporting threshold for winnings from a keno game to $1,500.

Section 7.6041–1(c) provides that bingo, keno, and slot machine winnings are reported on the Form W–2G, “Certain Gambling Winnings.” The payor must provide a copy of the Form W–2G to the payee by January 31 of the year following the year in which the reportable payment is made, and the payor must file the Form W–2G with the IRS by February 28 of the year following the year in which the reportable payment is made. The Form W–2G must include, among other things, the name, address, and taxpayer identification number of the payee and a general description of the two forms of identification used to verify this information.

Explanation of Provisions

The current regulations governing information reporting of winnings from bingo, keno, and slot machine play were published in 1977. There have been significant changes in gaming industry technology since that time. For instance, today many gaming establishments employ electronic slot machines and other mechanisms, such as player’s cards, that permit electronic tracking of wagers and/or winnings. In addition, there have been many changes in the tax information reporting regime since the late 1970s, such as the enactment of backup withholding and requirements for electronic filing of information returns, including the Form W–2G. Current regulations under § 7.6041–1 of
