The Final Plan

Recovery plans describe actions beneficial for the conservation and recovery of species listed under the ESA. Section 4(f)(1) of the ESA requires that recovery plans incorporate, to the maximum extent practicable: (1) Objective, measurable criteria which, when met, would result in a determination that the species is no longer threatened or endangered; (2) site-specific management actions necessary to achieve the Plan’s goals; and (3) estimates of the time required and costs to implement recovery actions. The ESA requires the development of recovery plans for each listed species unless a recovery plan would not promote a species’ conservation.

The purpose of the Plan is to rebuild and assure the long-term viability of elkhorn and staghorn coral populations in the wild, allowing ultimately for the species’ removal from the federal list of endangered and threatened species. The goal of the Plan is to increase the abundance and to protect the genetic diversity of elkhorn and staghorn coral populations throughout their geographical ranges while sufficiently abating threats to warrant delisting of both species. Elkhorn and staghorn coral populations should be large enough to include numerous groups of successfully reproducing individuals, including thickets, across the historical range of these species. These groups should be large enough to protect genetic diversity and maintain ecosystem function. The recovery approach includes research and monitoring to identify, reduce, or eliminate threats so the recovery objectives outlined in the Plan have the greatest likelihood of being achieved. Because some threats to elkhorn and staghorn corals cannot be directly managed (e.g., disease), the Plan pursues concurrent actions to address both local and global threats. Population enhancement is also an integral part of elkhorn and staghorn coral recovery through restoration, restocking, and active management. Ecosystem-level actions are identified to improve habitat quality and restore community structure and ecological functions, such as herbivory, to sustain adult colonies and enable successful recruitment in the wild over the long term. The goal, objectives, and criteria of the Plan represent NMFS’ expectation of conditions to recover elkhorn and staghorn corals so they no longer need the protective measures provided by the ESA.

The recovery criteria in the Plan are based on the current literature and expert consensus. In some cases, the current best available information is so limited that it is not practicable to identify recovery criteria. Instead, interim criteria are identified to gather and obtain the information necessary to establish final recovery criteria. Recovery criteria can be viewed as targets, or values, by which progress toward achievement of recovery objectives can be measured. In the Plan we frame recovery criteria both in terms of population parameters (Population-based Recovery Criteria) and the five ESA listing factors (Threat-based Recovery Criteria). The Plan also includes the projected timeframe to recover elkhorn and staghorn corals and the cost of implementing actions.

Conclusion

NMFS has reviewed the Plan for compliance with the requirements of ESA section 4(f), determined that it does incorporate the required elements, and is therefore adopting it as the Final Recovery Plan for elkhorn and staghorn corals.

Authority: 16 U.S.C. 1531 et seq.

Angela Somma,
Chief, Endangered Species Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Submission of Conservation Efforts To Make Listings Unnecessary Under the Endangered Species Act

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before May 5, 2015.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616,
