

to help students prepare for jobs in high-demand occupations. The evaluation will address three main research areas: (1) The impact of the YCC programs on students' short-term outcomes, (2) individual YCC program implementation, and (3) whether and how YCC programs varied in effectiveness based on student and grantee characteristics. The impact study will employ a randomized controlled trial to estimate program effectiveness and will be carried out in a subset of YCC grantees. The implementation study will draw on data gathered from all YCC grantees. The American Competitiveness and Workforce Improvement Act authorizes this information collection. See 29 U.S.C. 2916a.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notice published in the **Federal Register** on October 17, 2015 (79 FR 62467).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB ICR Reference Number 201501-1291-002. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Federal-Commercial Spectrum Sharing Workshop: Models, Application, and Impacts of Incentives for Sharing

AGENCY: The National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD).

ACTION: Notice.

SUMMARY: The Wireless Spectrum R&D Senior Steering Group (WSRD SSG) has been conducting a series of workshops on understanding the fundamental issues involved in Federal and Commercial Spectrum Sharing. The seventh workshop in this series will focus on incentives. This workshop titled, "Federal-Commercial Spectrum Sharing: Models, Applications, and Impacts of Incentives for Sharing", will be held on March 19, 2015, from 8:00 a.m. to 5:30 p.m., at the Stevens Institute of Technology, Hoboken, NJ. The workshop will be Webcast and the link will be made available at: [https://www.nitrd.gov/nitrdgroups/index.php?title=Wireless_Spectrum_Research_and_Development_\(WSRD\)#title](https://www.nitrd.gov/nitrdgroups/index.php?title=Wireless_Spectrum_Research_and_Development_(WSRD)#title). Information gathered from this workshop will be used by the WSRD SSG to develop recommendations for the White House Office of Science and Technology Policy (OSTP).

DATES: March 19, 2015.

Background: The WSRD SSG workshop series stems from the June 14, 2013 Presidential Memorandum, *Expanding America's Leadership in Wireless Innovation*, to make more wireless spectrum available for commercial use by encouraging shared access by commercial and federal users. One of the directives was to explore and recommend market-based or other approaches that would incentivize Federal and commercial users to cooperate in sharing spectrum. Different

groups have proposed a variety of budgetary and administrative incentives for Federal agencies. Proposals have included introduction of a spectrum currency and setting aside some portion of spectrum auction revenues to establish a spectrum efficiency or relocation fund. Internationally, the United Kingdom has explored charging spectrum usage fees to government agencies.

Rich and multidisciplinary research questions arise when considering incentives for bi-directional spectrum sharing. Sharing between government and commercial entities will require innovations in technology as well as in business, administrative, and market institutions and practices. Federal, public safety, and commercial users confront different constraints and strategic options, and can be expected to respond differently to opportunities and incentives. This workshop will discuss what research is needed to get a better understanding of these factors, including lessons learned, in order to identify incentives that will work.

Submitted by the National Science Foundation for the National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD) on February 25, 2015.
