

avoidance and minimization within the nearshore environment.

Deepwater Cable Route Alternatives—Three deepwater route alternatives with a common divergence point outside the U.S. were evaluated as part of the route planning process. These alternatives were not analyzed with respect to impacts on the human or natural environment because the DISA determined that the action of a one time, direct-laid SFOC system on the seabed has been demonstrated in past project actions at SFOMF and worldwide to ordinarily have only a minor, localized, and transient effect on the environment. Therefore, the action lacks the potential to cause significant harm to the environment outside the U.S. and meets the exemption requirement (E2.3.3.1.1) to prepare environmental documentation under Executive Order (E.O.) 12114, Environmental Effects Abroad of Major Federal Actions.

No Action Alternative—The No Action Alternative would be not to proceed with the GTMO SFOC system project linking NAVSTAGTMO at Guantanamo Bay, Cuba with the SFOMF facility at Dania Beach, Florida. NAVSTAGTMO would continue to operate with existing satellite communication capabilities which would not meet the operational need for reliability and additional bandwidth.

Conclusion: The GTMO SFOC EA was prepared and evaluated pursuant to NEPA, CEQ regulations at 40 CFR parts 1500–1508, and 32 CFR part 188. It has been concluded that, based on the analyses presented in the GTMO SFOC EA, the DISA has determined that no significant direct, indirect, or cumulative impacts would occur as a result of the Proposed Action. Therefore, no further study under NEPA is required, and a FONSI is thus warranted. In addition, the Proposed Action lacks the potential to cause significant harm to the environment outside the U.S. and thus is exempt from further environmental analyses under Executive Order 12114. Accordingly, the DISA approved the installation and operation of the GTMO SFOC.
