DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Resource Conservation and Recovery Act

On March 9, 2015, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the District of Puerto Rico in the lawsuit *United States v. Total Petroleum Puerto Rico Corp.*, Civil Action No. 3:15-cv-01201.

This settlement resolves the United States' allegations that Defendant Total Petroleum Puerto Rico Corp. ("Total Puerto Rico") violated the Resource Conservation and Recovery ("Act") and the Puerto Rico Underground Storage Tank Control Regulations ("PRUSTR") at thirty-one facilities in Puerto Rico, and the Act and its implementing regulations set forth at 40 CFR part 280 at four facilities in the U.S. Virgin Islands, all of which contain underground storage tanks ("USTs") owned by Total Puerto Rico. The United States' claims against Total Puerto Rico stem from the company's alleged failure to report and investigate suspected releases; to monitor for releases; to provide adequate overfill prevention and corrosion protection equipment; to secure dispensers and lines when facilities are temporarily closed; to secure monitoring wells; and to maintain records of release detection monitoring.

The proposed Consent Decree resolves these allegations by requiring that Total Puerto Rico pay a \$426,000 penalty, implement injunctive relief valued at approximately \$1,000,000, and undertake a Supplemental Environmental Project ("SEP") valued at approximately \$600,000. As part of the injunctive relief, Total Puerto Rico will install, or upgrade to, fully automated electronic release detection monitoring equipment at 137 facilities with Total-owned USTs in active operation. This obligation to install automated release detection monitoring equipment, which provide the best available method of release detection, will extend to any additional facilities with actively operating USTs acquired by Total Puerto Rico after the date of lodging of the Consent Decree. As part of the SEP, Total Puerto Rico will install a centralized monitoring system (CMS) for at least 125 of its facilities with actively
