On January 29, 2015, Spansion and all respondents filed an unopposed motion to terminate the investigation based on a settlement agreement between Spansion and Macronix. On the same day, Spansion and Macronix filed a joint motion to limit service of their settlement agreement pursuant to Commission Rule 210.21(b)(1). On February 9, 2015, Commission investigative attorney Monisha Deka ("IA") filed a response in support of both motions.

On February 18, 2015, the ALJ issued the subject ID granting both motions and terminating the investigation. The ALJ noted the parties’ assertion that the settlement agreement between Spansion and Macronix fully resolves the investigation with respect to all respondents and that there are no other agreements between the parties concerning the matter of this investigation. The ALJ further found no evidence that termination based on the settlement agreement would impose any undue burdens on public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, or U.S. consumers. To the contrary, the ALJ found that termination is in the public interest because it would avoid needless litigation and conserve public resources.

The ALJ found that Spansion and Macronix filed a confidential and public version of the settlement agreement in compliance with Commission Rule 210.21(b). The ALJ additionally found that because the settlement agreement at issue is confidential between Spansion and Macronix, there was good cause to limit service of that agreement to Spansion, the Macronix respondents, and the IA. No petitions for review of the ID were filed.

The Commission has determined not to review the ID. The authority for the Commission’s determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission’s Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: March 12, 2015.

Lisa R. Barton, Secretary to the Commission.
