**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for revision of a current information collection.

The marine mammal stranding report provides information on strandings so that the National Marine Fisheries Service (NMFS) can compile and analyze, by region, the species, numbers, conditions, and causes of illnesses and deaths (including health problems related to human interaction) in stranded marine mammals. NMFS requires this information to fulfill its management responsibilities under the Marine Mammal Protection Act (16 U.S.C. 1421a). NMFS is also responsible for the welfare of marine mammals while in rehabilitation status. The data from the marine mammal rehabilitation disposition report are required for monitoring and tracking of marine mammals held at various NMFS-authorized facilities.

Revision: The data from a new human interaction exam form are required for monitoring and tracking of illnesses, injury, and death related to human interaction. This information will be submitted primarily by members of the marine mammal stranding networks which are authorized by NMFS.

**II. Method of Collection**

Paper applications, electronic reports, and telephone calls are required from participants, and methods of submittal include Internet through the NMFS National Marine Mammal Stranding Database; facsimile transmission of paper forms; or mailed copies of forms.
