will receive the questionnaire, and the average time to complete will be about 15 minutes. (The number of students is based on appropriate number of students from fiscal years 2012 -2013). Though we would like a 100% response rate, we anticipate a 75% response rate of those surveyed (or 750); with 25% of the students not responding to the questionnaire.

6 An estimate of the total public burden (in hours) associated with the collection: Given that the approximately 75% of those surveyed (or 750) will respond, the total public burden for completing the questionnaire is 187 hours.
