

platform user instructions, and demonstration plans and scripts necessary to demonstrate the desired capabilities. Each prospective participant will train NIST personnel as necessary, to operate its product in capability demonstrations to the financial services community. Following successful demonstrations, NIST will publish a description of the security platform and its performance characteristics sufficient to permit other organizations to develop and deploy security platforms that meet the security objectives of the Access Rights Management for the Financial Services sector use case. These descriptions will be public information. Under the terms of the consortium agreement, NIST will support development of interfaces among participants' products by providing IT infrastructure, laboratory facilities, office facilities, collaboration facilities, and staff support to component composition, security platform documentation, and demonstration activities.

The dates of the demonstration of the Access Rights Management for the Financial Services sector capability will be announced on the NCCoE Web site at least two weeks in advance at <http://nccoe.nist.gov/>. The expected outcome of the demonstration is to improve access rights management across an entire financial services sector enterprise. Participating organizations will gain from the knowledge that their products are interoperable with other participants' offerings.

For additional information on the NCCoE governance, business processes, and NCCoE operational structure, visit the NCCoE Web site <http://nccoe.nist.gov/>.

Richard Cavanagh,

Acting Associate Director for Laboratory Programs.
