SUPPLEMENTARY INFORMATION:

I. BMW’s Petition: Pursuant to 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

II. Vehicles Involved: Affected are approximately 68 MY 2015 BMW model X5 xDrive35i and model X5 xDrive35d MPVs manufactured between October 3, 2014 through October 7, 2014.

III. Noncompliance: BMW explains that the vehicle certification labels required by 49 CFR part 567, and some of the tire information labels required by FMVSS No. 110, affixed to the subject vehicles show that vehicles were originally equipped with 18-inch tires and rims. The vehicles were actually originally quipped with 19-inch tires and rims. BMW believes that the noncompliance is that the certification label required by 49 CFR part 567, and in some cases the tire information labels required by FMVSS No. 110, do not list rim information for the tires installed on the vehicles as original equipment as required by paragraph S4.3.3 of FMVSS No. 110.

Rule Text: Paragraph S4.3.3 of FMVSS No. 110 requires in pertinent part:

S4.3.3 Additional labeling information for vehicles other than passenger cars. Each vehicle shall show the size designation and, if applicable, the type designation of rims (not necessarily those on the vehicle) appropriate for the tire appropriate for use on that vehicle, including the tire installed as original equipment on the vehicle by the vehicle manufacturer, after each GAWR listed on the certification label required by § 567.4 or § 567.5 of this chapter . . . .

V. Summary of BMW’s Analyses:
BMW stated its belief that the subject noncompliance is inconsequential to motor vehicle safety for the following reasons:

In the case of the subject vehicles with an incorrect Part 567 certification label but a correct FMVSS No. 110 tire information label, BMW states that when a person checks or adjusts the inflation of a tire and uses this (correct) FMVSS No. 110 tire information label, the person will have the correct inflation pressure available from that label. If, however, the person only looks at the certification label, or both the certification and tire information labels, BMW states that the person may then become unsure of what tires have been installed on the vehicle. Should this occur, BMW states that a number of information sources and services are available which can be used to determine the correct tire size and recommended cold inflation pressure.

BMW states that these information sources include the tire information label on the vehicle which have the tire size information contained on their
