

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commentors will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commentors will not be required to serve copies of filed documents on all other parties. However, the non-party commentors will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Commission records indicate that the project was transferred to Mr. Richard Berteau by a Commission order issued May 6, 1991 (55 FERC ¶ 62,108). Since then, the project stopped operating around the end of 1999. The Commission's San Francisco Regional Office has had several correspondences with the new owner and requested a plan and schedule to return the project to operation and to complete a formal request for a transfer of the license to the Bently Family Limited Partnership. Nothing was filed. On January 20, 2015, staff sent the licensee (Mr. Berteau), to his mailing address on record, a letter requiring the filing within 30 days, of an application for a transfer of license and a plan and schedule for restoring the operation of the project or an application to surrender the project's license. Staff also sent a copy of the letter to the Bently Family Limited Partnership. The letter stated that if no response is filed, the Commission will take action to terminate license by implied surrender pursuant to the Commission's regulations at 18 CFR 6.4. The letter to the licensee was returned due to lack of a forwarding address. Nothing was filed.

**SUPPLEMENTARY INFORMATION:** This document entitled Draft Impacts of Climate Change on Human Health in the United States: A Scientific Assessment has been developed under the auspices of The Interagency Group on Climate Change and Human Health (CCHHG), a working group of the U.S. Global Change Research Program (USGCRP), as part of the ongoing efforts of USGCRP's National Climate Assessment (NCA) and as called for under the President's Climate Action Plan. The draft assessment was written by federal employees, contractors, or affiliates who were selected from author nominations based on their demonstrated subject matter expertise, relevant publications, and knowledge of specific topics designated in the draft outline. This draft USGCRP Climate and Health Assessment responds to the 1990 Congressional mandate to periodically produce National Climate Assessments and to assist the nation in understanding, assessing, predicting, and responding to human-induced and natural processes of global change.

The purpose of this draft assessment is to provide a comprehensive, evidence-based, and, where possible, quantitative estimation of observed and projected climate change related health impacts in the United States. It is intended to inform public health officials, disaster response planners, multi-sector policy and decision makers, and other stakeholders about the risks that climate change presents to human health.

The focus of this draft assessment is the health impacts of climate change in the United States. The assessment does not include detailed discussions of climate mitigation, adaptation, or economic valuation, nor does it make policy recommendations. Similarly, while this assessment does not focus on health research needs or gaps, brief insights on research needs gained while conducting this assessment will be included at the end of each chapter.

The USGCRP welcomes all comments on the content of its draft assessment at <http://www.globalchange.gov/health-assessment>.
