k. Description of Request: The applicant proposes to construct a new 16-foot-high, 60-foot-wide diversion dam located on the West Fork Upper Battle Creek. The diversion dam would be built on the Battle Creek. The diversion dam would feed a 6-foot-diameter, 9,100-foot-long underground steel pipe emptying into a rip-rap stilling basin. Water would then travel through a 1,000 foot-long canal to a natural stream channel draining to Bradley Lake, the main reservoir for the project. The applicant also proposes to construct 2.9 miles of new access roads for construction and maintenance of the new facilities. The proposal would not change the authorized installed capacity of the project; however, it is expected to increase the average annual generation by 37,000 megawatt-hours. Most of the new facilities would be constructed on lands owned by the State of Alaska though some would be constructed on federal land already occupied by the project and administered by the Bureau of Land Management.

l. Locations of the Application: A copy of any protest or motion to intervene must be served upon each intervenor of the applicant specified in the particular application. All comments, motions to intervene, or protests should relate to project works which are the subject of the amendment. Agencies may obtain copies of the application directly from the applicant.
