

was approved for Hematite License Amendment 60, and the 22,000 m³ (29,000 yd³) of LLRW that was approved for Hematite License Amendment 63. As such, the cumulative impacts on the USEI facility and surrounding environment resulting from the receipt of the waste material described in the aforementioned license amendments were considered.

In 2002, WEC and the Missouri Department of Natural Resources (MDNR) entered into a Letter Agreement, which, among other things, provided for MDNR oversight of certain studies and response actions in accordance with the National Oil and Hazardous Substances Pollution Contingency Plan under the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. 9601 *et seq.* (Westinghouse MDNR Review Draft Remedial Design Work Plan, 2002).

On July 3, 2008, Missouri and WEC entered into a Consent Decree, and the Letter Agreement was terminated. The Consent Decree provides for MDNR oversight of those portions of the investigation and selection of the remedy for Operable Units at the site that are not preempted by the Atomic Energy Act of 1954, as amended. The Selected Remedy for Operable Unit 1 at the HDP is Alternative 4: Removal, Treatment of Volatile Organic Compound Waste, and Off-site Disposal of Low-Level Radioactive Waste and Non-Hazardous Treatment Residues.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the “no-action” alternative). The no-action alternative involves discontinuing ongoing decommissioning activities at the HDP and leaving contaminated soil and other radioactive waste at the HDP site. This action would require an exemption from the requirement in 10 CFR 70.38(d) that decommissioning of facilities specifically licensed for possession and use of special nuclear material be completed and approved by the NRC after licensed activities cease. The no-action alternative would result in leaving approximately 87,100 m³ of total waste volume onsite.

As was previously noted, the radioactive waste, regulated by the NRC, is co-mingled with chemically contaminated waste regulated under CERCLA. The no-action alternative would not be in accordance with the July 2009 CERCLA Record of Decision (<http://www.dnr.mo.gov/env/hwp/docs/>

20090721HRFINALROD.pdf) for the removal and subsequent treatment of the chemically contaminated waste.

The no-action alternative would not allow WEC to meet the requirements of 10 CFR 20.1402 for unrestricted release. Selection of this alternative would require WEC to continue environmental monitoring/surveillance and to maintain administrative and engineered controls to ensure facility safety and security. The environmental impacts of the no-action alternative would include continued contamination of soil and water, which could further escalate over time if groundwater contamination spreads and material such as Technetium-99 continue to leach into the soil. The continued monitoring required at the site would result in environmental impacts due to the emissions from vehicular traffic associated with workers traversing to and from the site and entities providing services and supplies to the Hematite facility. Additional vehicular traffic could also impact public and occupational health with the potential for vehicle accidents.

Another alternative to the proposed action is to dispose of the LLRW in a facility licensed by an NRC Agreement State for the storage and/or disposal of LLRW. For this EA, the NRC evaluated the EnergySolutions, LLC (EnergySolutions) Clive, Utah, facility as the alternative disposal site for the radioactive and chemically hazardous waste.

The EnergySolutions LLRW disposal facility at Clive, Utah, is located 128 kilometers (80 miles) west of Salt Lake City, Utah, and 70 kilometers (45 miles) east of Wendover, Nevada. The site is arid with an annual precipitation of approximately 20 centimeters (8 inches). The facility is licensed by the State of Utah, to dispose of Class A radioactive waste only (Utah License 2300249) and 11e.(2) byproduct material (UT2300478) and holds a Part B Resource Conservation and Recovery Act (RCRA) solid waste permit (Environmental Protection Agency ID No. UTD982598898).

The selection of this alternative would allow WEC to meet the requirements of 10 CFR 20.1402 for unrestricted release. In addition, this site is environmentally similar to USEI. However, this alternative was not selected by WEC.

Alternative Use of Resources

The proposed action does not impact any resource implications discussed in previous environmental reviews.

Agencies and Persons Consulted

In accordance with its stated policy, the NRC staff consulted with the Missouri Department of Conservation, Idaho Department of Fish and Game, and U.S. Fish and Wildlife Service during the development of this EA. On January 14, 2015, the NRC staff consulted with MDNR and IDEQ regarding the environmental impact of the proposed action and solicited comments on a draft EA and FONSI. No comments were received.

III. Finding of No Significant Impact

WEC has requested NRC authorization under 10 CFR 20.2002 for the alternate disposal of an additional 87,100 m³ of radioactive waste consisting of buried debris and contaminated soil, concrete and asphalt, filter media, ion exchange resin and piping containing NRC-licensed source, byproduct, and special nuclear material. In addition, both WEC and USEI have requested that the NRC exempt USEI from the requirements of 10 CFR 30.3 and 10 CFR 70.3. Consistent with 10 CFR 51.21, the NRC conducted the EA for the proposed action described Section II of this document and publicly available in ADAMS (ADAMS Accession No. ML15029A064). The EA is incorporated by reference in this finding. On the basis of the EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

Dated at Rockville, Maryland this 8th day of April 2015.

For The Nuclear Regulatory Commission.

Andrew Persinko,

Deputy Director, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on the Medical Uses of Isotopes: Meeting Notice

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of meeting.

SUMMARY: The U.S. Nuclear Regulatory Commission will convene a teleconference meeting of the Advisory Committee on the Medical Uses of Isotopes (ACMUI) on August 12, 2015, to discuss the ACMUI Germanium/

Gallium-68 subcommittee report. Meeting information, including a copy of the agenda and handouts, will be available at <http://www.nrc.gov/reading-rm/doc-collections/acmui/meetings/2015.html>. The agenda and handouts may also be obtained by contacting Ms. Sophie Holiday using the information below.

DATES: The teleconference meeting will be held on Wednesday, August 12, 2015, 2:00 p.m. to 4:00 p.m. Eastern Standard Time.

Public Participation: Any member of the public who wishes to participate in the teleconference should contact Ms. Holiday using the contact information below.

Contact Information: Ms. Sophie Holiday, U.S. Nuclear Regulatory Commission, Office of Nuclear Material Safety and Safeguards; by telephone: (404) 997-4691; or by email: sophie.holiday@nrc.gov.

Conduct of the Meeting

Dr. Bruce Thomadsen, ACMUI Chairman, will preside over the meeting. Dr. Thomadsen will conduct the meeting in a manner that will facilitate the orderly conduct of business. The following procedures apply to public participation in the meeting:

1. Persons who wish to provide a written statement should submit an electronic copy to Ms. Holiday at the contact information listed above. All submittals must be received by August 07, 2015, three business days prior to the meeting, and must pertain to the topic on the agenda for the meeting.

2. Questions and comments from members of the public will be permitted during the meetings, at the discretion of the Chairman.

3. The draft transcript and meeting summary will be available on ACMUI's Web site <http://www.nrc.gov/reading-rm/doc-collections/acmui/meetings/2015.html> on or about September 24, 2015.

This meeting will be held in accordance with the Atomic Energy Act of 1954, as amended (primarily section 161a); the Federal Advisory Committee Act (5 U.S.C. App); and the Commission's regulations in title 10 of the *Code of Federal Regulations* part 7.

Dated at Rockville, Maryland, this 13th day of April 2015.

For the Nuclear Regulatory Commission.

Andrew L. Bates,

Advisory Committee Management Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 52-016; NRC-2008-0250]

UniStar Nuclear Energy; Combined License Application for Calvert Cliffs Nuclear Power Plant, Unit 3

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a December 31, 2014, letter from UniStar Nuclear Energy (UNE), on behalf of Calvert Cliffs Nuclear Project, LLC, and UniStar Operating Services, LLC, co-applicants for the combined license (COL) application for the Calvert Cliffs Nuclear Power Plant Unit 3 (CCNPP3), which requested an exemption to delay the submission of the annual update of the Final Safety Analysis Report (FSAR) to be included in their COL application. The NRC staff reviewed this request and determined that it is appropriate to grant the exemption to delay the FSAR update submittal up to December 31, 2015.

ADDRESSES: Please refer to Docket ID NRC-2008-0250 when contacting the NRC about the availability of information regarding this document. You may access the publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0250. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For the technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that a document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at

the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT:

Surinder Arora, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-1421, or email: Surinder.Arora@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On March 14, 2008, UNE, on behalf of Calvert Cliffs Nuclear Project, LLC and UniStar Operating services, LLC, submitted to the NRC a COL application, under subpart C of part 52 of *Title 10 of the Code of Federal Regulations* (10 CFR) to construct and operate a single unit of AREVA NP's U.S. Evolutionary Power Reactor (EPR), designated as Calvert Cliffs Nuclear Power Plant Unit 3, at a site in Calvert County, Maryland. The UNE application was docketed on June 3, 2008 (Docket Number 52-016). UNE's COL application for CCNPP3 incorporates by reference AREVA NP's application for a standard design certification for the U.S. EPR. The NRC is currently performing concurrent reviews of the CCNPP3 COL application as well as AREVA NP's application for design certification of the U.S. EPR. UNE also had previously requested an exemption on November 19, 2013 (this request was later supplemented by UNE's follow up updated request on March 21, 2014), under 10 CFR 50.71(e)(3)(iii) to submit the scheduled 2013 FSAR update, and proposed, for approval, a new submittal deadline of December 31, 2014. The NRC reviewed the bases for the exemption request and granted the exemption as described in **Federal Register** notice published on September 11, 2014 (79 FR 54303).

By a letter dated December 16, 2014 (ADAMS Accession No. ML14351A301), UNE requested that after January 2015, the NRC defer its safety review portion of the Calvert Cliffs Unit 3 COL application until such time that UNE formally requests that the NRC resume its review. The letter also stated that UNE will monitor and evaluate progress of the technical issue resolution for the U.S. EPR FSAR and the development of guidance necessary to address Foreign Ownership Control and Domination (FOCD) prior to requesting the NRC to resume review. By letter dated February 27, 2015 (ADAMS Accession No. ML15062A050), UNE requested that after March 6, 2015, the NRC suspend the Calvert Cliffs Unit 3 COL application review until such time the UNE formally requests that the NRC
