If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide" series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, "Alternate Risk-Informed Approach for Addressing the Effects of Debris On Post-Accident Long-Term Core Cooling," is a proposed new guide temporarily identified by its task number, DG-1322. This DG-1322 proposes new guidance that describes methods and procedures that the staff considers acceptable for complying with a voluntary, risk-informed alternative in a proposed revision of the NRC's regulation governing the design of ECCS, section 50.46c of Title 10 of the

Code of Federal Regulations (10 CFR), “Emergency core cooling system performance during loss-of-coolant accidents (LOCA),” with respect to the effects of debris during long-term cooling.

The voluntary alternative was included in the proposed 10 CFR 50.46c rule at the direction of the Commission in the Staff Requirements Memorandum (SRM) regarding SECY-12-0093 “Closure Options for Generic Safety Issue—191, Assessment of Debris Accumulation on Pressurized-Water Reactor Sump Performance,” and in the SRM regarding SECY-12-0034 “Proposed Rulemaking—10 CFR 50.46c: Emergency Core Cooling System Performance During Loss-of-Coolant Accidents (RIN 3150-AH42).” This guide is intended to provide a consistent approach for licensees to use when performing a risk assessment of the complex phenomena associated with debris generation and transport, and the resulting effect on long-term core cooling.

III. Backfitting and Issue Finality

This DG, if finalized, would not constitute backfitting as defined in § 50.109 (the Backfit Rule), and would not be otherwise inconsistent with the issue finality provisions in 10 CFR part 52, “Licenses, Certifications and Approvals for Nuclear Power Plants.” The NRC published a proposed revision of 10 CFR 50.46c on March 24, 2014 (79 FR 16106). The proposed rule includes the option of allowing an applicant or licensee to address the effects of debris on longterm cooling with respect to ECCS performance requirements in § 50.46c and GDC-35 using a risk-informed approach. The proposed rule would also allow applicants and licensees who select the option to use the same approach in demonstrating compliance with GDC-38 and GDC-41. This DG provides guidance on one possible means for implementing that option. The proposed guidance does not exceed the scope of the proposed rule. Therefore, the backfitting and issue finality discussion for the proposed rule applies to this DG, and further consideration and discussion of backfitting and issue finality for the DG is not necessary.

Dated at Rockville, Maryland, this 13th day of April 2015.

For the Nuclear Regulatory Commission.

Harriet Karagiannis,

Acting Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.

SUPPLEMENTARY INFORMATION:

Introduction

The Equal Employment Opportunity Commission (“EEOC” or “Commission”) is issuing a proposed rule that would amend the regulations and interpretive guidance implementing Title I of the Americans with Disabilities Act (ADA) as they relate to employer wellness programs. Congress enacted the ADA in 1990 to prohibit discrimination against individuals with disabilities. The EEOC issued implementing regulations in 1991 to provide additional guidance on the law’s requirements and prohibited practices with respect to employment.¹
