Melamine is a crystalline powder or granule typically (but not exclusively) used to manufacture melamine formaldehyde resins. All melamine is covered by the scope of this investigation irrespective of purity, particle size, or physical form. Melamine that has been blended with other products is included within this scope when such blends include constituent parts that have been intermingled, but that have not been chemically reacted with each other to produce a different product. For such blends, only the melamine component of the mixture is covered by the scope of this investigation. Melamine that is otherwise subject to this investigation is not excluded when commingled with melamine from sources not subject to this investigation. Only the subject component of such commingled products is covered by the scope of this investigation.

The subject merchandise is provided for in subheading 2933.61.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is covered by the scope of this investigation, only the subject commingled with melamine from sources not subject to this investigation. The written description of the scope is dispositive.

Appendix 2
List of Topics Discussed in the Preliminary Issues and Decision Memorandum
1. Summary
2. Background
3. Alignment
4. Scope Comments
5. Scope of the Investigation
6. Injury Test
7. Subsidies Valuation
8. Unequityworthiness and Uncreditworthiness
9. Analysis of Programs
10. ITC Notification
11. Disclosure and Public Comment
12. Verification
