

future opportunities and problems, such as resource, operational, administrative, and visitor use issues facing the park. The GMP serves as the basis for future detailed management documents, such as five-year strategic plans and implementation plans. In addition, the wilderness study component determines if eligible portions of the park should be proposed for wilderness designation.

The Final EIS/GMP/Wilderness Study responds to, and incorporates as appropriate, agency and public comments received on the Draft Plan/Wilderness Study/EIS, which was available for public and agency review and comment during the extended 90-day comment period. Two public meetings were held to gather input on the Draft Plan/Wilderness Study/EIS, one of which also included a public hearing on the wilderness study. One thousand, six hundred and twenty pieces of correspondence were received during the public review period. Agency and public comments and NPS responses are provided in Chapter 5 in the Final EIS/GMP/Wilderness Study.

The Final EIS/GMP/Wilderness Study describes and analyzes three alternatives for Channel Islands National Park. *Alternative 1* (No Action Alternative) reflects current management direction and serves as a baseline for comparison with the other alternatives. Existing facilities, resource programs, and visitor opportunities would continue as they are. No areas of the park would be proposed for wilderness designation.

Alternative 2—This alternative emphasizes ecosystem preservation, restoration, and preservation of large expanses in relatively pristine resource conditions. Resource stewardship including ecosystem preservation and restoration, and preservation of natural landscapes, cultural landscapes, archeological resources, and historic structures would continue to be emphasized. Increased recreational opportunities would be provided for visitors to enjoy and appreciate the park. Under Alternative 2, a total of 66,576 acres of the park would be proposed for eventual wilderness designation, primarily on Santa Rosa and Santa Cruz Islands.

Alternative 3 (Preferred Alternative)—This alternative emphasizes resource stewardship and resource preservation; while also placing more attention on expanding education and recreational opportunities and accommodations to provide diverse visitor experiences on the islands. Under Alternative 3, as under Alternative 2, a total of 65,278 acres would be proposed for eventual wilderness designation.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, the State Plans) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and cost) is minimized, collection instruments are understandable, and OSHA's estimate of the information collection burden is accurate. Currently, OSHA is soliciting comments concerning the extension of the information collection requirements contained in the series of regulations establishing requirements for the submission, initial approval, continuing approval, final approval, monitoring and evaluation of OSHA-approved State Plans:

- 29 CFR part 1902, State Plans for the Development and Enforcement of State Standards;

- 29 CFR part 1952, Approved State Plans for Enforcement of State Standards;

- 29 CFR part 1953, Changes to State Plans for the Development and Enforcement of State Standards;

- 29 CFR part 1954, Procedures for the Evaluation and Monitoring of Approved State Plans;

- 29 CFR part 1955, Procedures for Withdrawal of Approval of State Plans; and

- 29 CFR part 1956, State Plans for the Development and Enforcement of State Standards Applicable to State and Local Government Employees in States without Approved Private Employee Plans.

Section 18 of the Occupational Safety and Health Act (29 U.S.C. 667) offers an opportunity to the states to assume responsibility for the development and enforcement of state standards through the mechanism of an OSHA-approved State Plan. Absent an approved plan, states are precluded from enforcing occupational safety and health standards in the private sector with respect to any issue for which Federal OSHA has promulgated a standard. Once approved and operational, the state adopts standards and provides most occupational safety and health enforcement and compliance assistance in the state, under the authority of its plan, instead of Federal OSHA. States also must extend their jurisdiction to cover state and local government employees and may obtain approval of State Plans limited in scope to these workers. To obtain and maintain State Plan approval, a state must submit various documents to OSHA describing its program structure and operation, including any modifications thereto as they occur, in accordance with the identified regulations. OSHA funds 50 percent of the costs required to be incurred by an approved State Plan with the state at least matching and providing additional funding at its discretion.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on participating states who must comply;
