

Defense Services Proposed to be Sold:
See Attached Annex.

(viii) *Date Report Delivered to Congress:* 07 April 2015

POLICY JUSTIFICATION

Egypt—AGM-114K/R3 Hellfire II Missiles

The Government of Egypt has requested a possible sale of 356 AGM-114K/R3 Hellfire II Air-to-Ground missiles with containers, spare and repair parts, support equipment, publications and technical documentation, personnel training and training equipment, U.S. Government and contractor engineering, technical and logistics support services, and other related elements of logistical and program support. The estimated cost is \$57 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been and continues to be an important force for political stability and economic progress in the Middle East.

Egypt will use the enhanced capability as a deterrent to regional threats and to strengthen its homeland defense. While this potential sale would be the first transfer of the R variant of this missile to Egypt, Egypt already has the F and K variants in its inventory and will have no difficulty absorbing these additional missiles.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Corporation in Orlando, Florida. There are no known offset agreements proposed in connection with this potential sale.

Implementation of the proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-03

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended Annex Item No. vii

(vii) *Sensitivity of Technology:*

1. The AGM-114K/R Hellfire II is an air-to-ground missile used against heavy and light armored targets, thin skinned vehicles, urban structures, bunkers, caves and personnel. The new AGM-114R missile is Inertial Measurement Unit (IMU) based, with a variable delay fuse and improved safety and reliability.

2. The highest level for release of the AGM-114K/R Hellfire II is Secret, based upon the software. The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is Secret; the highest level that must be disclosed for production, maintenance, or training is Confidential. Vulnerability data, countermeasures, vulnerability/ susceptibility analyses, and threat definitions are classified up to Secret.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent system with might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Egypt.
