j. *Deadline for filing motions to intervene and protests, comments, terms and conditions, and recommendations:* Due to the small size and coordination with state and federal agencies during preparation of the application, the 60-day timeframe in 18 CFR 4.34(b) is shortened. Instead, motions to intervene and protests, comments, terms and conditions, and recommendations are due 30 days from the issuance date of this notice. All reply comments must be

filed with the Commission within 45 days from the issuance date of this notice.

The Commission strongly encourages electronic filing. Please file motions to intervene, protests, comments, and recommendations using the Commission’s eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. The Commission’s Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing and is now ready for environmental analysis.

l. The Brooklyn Dam Hydroelectric Project would consist of: (1) An existing 163-foot-long and 14-foot-high dam that includes: (a) A 113-foot-long spillway with a crest elevation 878.69 feet National Geodetic Vertical Datum of 1929 (NGVD29); (b) 2.50-foot-high flashboards with a crest elevation 881.23 feet NGVD29; and (c) a 50-foot-long floodgate structure with four 6.9-foot-wide, 10-foot-high floodgates; (2) an existing 100-foot-long, 45-foot-wide forebay with three 15.2-foot-wide, 15.5-foot-high trashracks with 1.0-inch open bar spacing; (3) an existing 40-foot-long, 15.78-foot-high tailrace training wall; (4) an existing 9-foot-wide, 9-foot-high side waste gate; (5) an existing 26-acre impoundment having a gross storage capacity of 52-acre-feet at elevation 881.23 feet NGVD29; (6) an existing 45-foot-long, 48-foot-wide, and 23-foot-high brick and concrete powerhouse that would contain two proposed 300-kilowatt (kW), Kaplan turbine-generating units for a total installed capacity of 600 kW; (7) an existing 48-foot-long, 45-foot-wide tailrace; (8) a proposed 400-foot-long 35.4-kilovolt

above-ground transmission line; (9) three proposed single phased transformers; and (10) appurtenant facilities. On average, the project would generate approximately 2,800 megawatt-hours annually. The applicant proposes to remove a non-operating sluice gate on the spillway, rehabilitate the powerhouse, and operate the project in a run-of-river mode.

m. Due to the project works already existing and the limited scope of proposed rehabilitation of the project site described above, the applicant's close coordination with federal and state agencies during the preparation of the application, completed studies during pre-filing consultation, and agency recommended preliminary terms and conditions, we intend to waive scoping and expedite the exemption process. Based on a review of the application, resource agency consultation letters including the preliminary 30(c) terms and conditions, and comments filed to date, Commission staff intends to prepare a single environmental assessment (EA). Commission staff determined that the issues that need to be addressed in its EA have been adequately identified during the pre-filing period, which included a public meeting and site visit, and no new issues are likely to be identified through additional scoping. The EA will consider assessing the potential effects of project construction and operation on aquatic, terrestrial, threatened and endangered species, recreation and land use, aesthetic, and cultural and historic resources.

n. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.
