SUPPLEMENTARY INFORMATION:

Background

On March 03, 2015, we published a positive 90-day finding on a petition from Friends of Animals requesting that we list the common thresher shark Alopias vulpinus as endangered or threatened under the ESA, or, in the alternative, delineate six distinct population segments (DPSs) of the common thresher shark, as described in the petition, and list them as endangered or threatened. In that notice we also announced the initiation of a status review and solicited information from the public to help inform the status review of the species and determine its risk of extinction.

We received a request to extend the public comment period by 60 days in order to provide the public with additional time to gather relevant information and adequately comment on the validity of the petitioned action in a meaningful and constructive manner. In addition, a technical error on the Regulations.gov Web site prevented the public from accessing materials in the docket folder for the 90-day finding, including existing public comments and other substantive materials. We considered the request and concluded that a 60-day extension should allow sufficient time for responders to submit comments without significantly delaying the completion of the status review. We are therefore extending the close of the public comment period from May 04, 2015 to July 6, 2015.

Although we have extended the public comment period, we are unable to extend the deadline for completing the status review. As such, we urge members of the public to submit their comments as soon as possible to allow us more time to review and incorporate the submitted information where appropriate.

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 et seq.).

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.
