SUPPLEMENTARY INFORMATION:

I. Background

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 52 to the GEIS regarding the renewal of FENOC operating license NPF-3 for an additional 20 years of operation for Davis-Besse. Draft Supplement 52 to the GEIS was noticed by the NRC in the **Federal Register** on March 7, 2014 (79 FR 13079), and

noticed by the Environmental Protection Agency on March 21, 2014 (79 FR 15741). The public comment period on draft Supplement 52 to the GEIS ended on April 21, 2014, and the comments received are addressed in final Supplement 52 to the GEIS. Final Supplement 52 to the GEIS is available as indicated in the **ADDRESSES** section of this document, and is available for public inspection at the Toledo-Lucas County Public Library, 325 Michigan Street, Toledo, Ohio 43604; and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

II. Discussion

As discussed in Section 9.4 of the final Supplement 52 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Davis-Besse are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by FENOC; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff’s independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 29th day of April 2015.

For the Nuclear Regulatory Commission.

Brian D. Wittick,

Chief, Projects Branch 2, Division of License Renewal, Office of Nuclear Reactor Regulation.
