#### SUPPLEMENTARY INFORMATION:

##### I. Background

In accordance with § 51.118 of Title 10 of the *Code of Federal Regulations*, the NRC is making available final Supplement 52 to the GEIS regarding the renewal of FENOC operating license NPF-3 for an additional 20 years of operation for Davis-Besse. Draft Supplement 52 to the GEIS was noticed by the NRC in the **Federal Register** on March 7, 2014 (79 FR 13079), and

noticed by the Environmental Protection Agency on March 21, 2014 (79 FR 15741). The public comment period on draft Supplement 52 to the GEIS ended on April 21, 2014, and the comments received are addressed in final Supplement 52 to the GEIS. Final Supplement 52 to the GEIS is available as indicated in the **ADDRESSES** section of this document, and is available for public inspection at the Toledo-Lucas County Public Library, 325 Michigan Street, Toledo, Ohio 43604; and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio 43452.

##### II. Discussion

As discussed in Section 9.4 of the final Supplement 52 to the GEIS, the NRC determined that the adverse environmental impacts of license renewal for Davis-Besse are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) The analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by FENOC; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff’s independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 29th day of April 2015.

For the Nuclear Regulatory Commission.

**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

Under section 2.106 of Title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is providing notice of the issuance of COL NPF-95 to DTE and, under 10 CFR 51.102(c), the Record of Decision (ROD). With respect to the application for the COL filed by DTE, the NRC finds that the applicable standards and requirements of the Atomic Energy Act of 1954, as amended,

and the Commission's regulations have been met. The NRC finds that any required notifications to other agencies or bodies have been duly made and that there is reasonable assurance that the facility will be constructed and will operate in conformity with the license, as amended, the provisions of the Act, and the Commission's regulations. Furthermore, the NRC finds that the licensee is technically and financially qualified to engage in the activities authorized, and that issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. Finally, the NRC finds that the findings required by subpart A of 10 CFR part 51 have been made.

Accordingly, the COL was issued on May 1, 2015, and is effective immediately.

**II. Further Information**

The NRC has prepared a Final Safety Evaluation Report (FSER) and Final Environmental Impact Statement (FEIS) that document the information reviewed and NRC's conclusion. The Commission has also issued its Memorandum and Order documenting its final decision on the uncontested hearing held on February 4, 2015, which serves as the Record of Decision ROD in this proceeding. The NRC also prepared a document summarizing the ROD to accompany its action on the COL application that incorporates by reference materials contained in the FEIS. In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," details with respect to this action, including the FSER FEIS, Summary ROD, and accompanying documentation included in the combined license package, as well as the Commission's hearing decision and ROD, are available online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. From this site, persons can access the NRC's ADAMS, which provides text and image files of NRC's public documents.
