The company plans to mine the Federal coal as an extension from its existing underground mine if the lease is obtained. The proposed mine would recover coal from the Middle Kittanning seam at the base of the Pennsylvanian aged Lower Freeport Sandstone. As required under 43 CFR 3425.4, the public is invited to the hearing to give public oral and/or written comments on the EA, the FMV, and MER of the Federal tract. Written comments must be received within 30 days following the date of the public hearing. The meeting is being advertised in the *Athens News*, *Athens Messenger* and the *Logan Daily* area newspapers.

The EA addresses the cultural, socioeconomic, environmental and cumulative impacts that would likely result from leasing these coal lands. Two alternatives are addressed in the EA:

Alternative 1 (Proposed Action) The tract would be leased, as applied for.

Alternative 2 (No Action) The application would be rejected or denied. The Federal coal would therefore be bypassed.

Proprietary data marked as confidential may be submitted to the BLM in response to the solicitation of public comments. Data so marked shall be treated in accordance with the laws and the regulations governing the confidentiality of such information. A copy of the comments submitted by the public on FMV and MER, except those portions identified as proprietary by the author and meeting exemptions stated in the Freedom of Information Act, will be available for public inspection at the Eastern States Office, 20 M Street SE., Suite 950, Washington, DC 20003, 9th Floor, during regular business hours (9 a.m. to 4 p.m.), Monday through Friday. Written comments on the FMV and MER should address, but need not be limited to the following:

1. The quality and quantity of the coal resource;

2. The mining methods or methods which would achieve MER of the coal, including specifications of seams to be mined and the most desirable timing and rate of production;

3. Restrictions to mining that may affect coal recovery;

4. The price that the mined coal would bring when sold;

5. Costs, including mining and reclamation, of producing the coal and the time of production;

6. The percentage rate at which anticipated income streams should be discounted, either with inflation or in the absence of inflation, in which case the anticipated rate of inflation should be given;

7. Depreciation, depletion, amortization and other tax accounting factors;

8. The value of any surface estate where held privately;

9. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area; and

10. Any comparable sales data of similar coal lands and coal quantities.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
