#### SUPPLEMENTARY INFORMATION:

*Title:* FERC-576, Report of Service Interruptions.

*OMB Control No.:* 1902-0004.

*Type of Request:* Three-year extension of the FERC-576 information collection

requirements with no changes to the current reporting requirements.

*Abstract:* A natural gas company must obtain Commission authorization to engage in the transportation, sale, or exchange of natural gas in interstate commerce under the Natural Gas Act (NGA).<sup>1</sup> The NGA also empowers the Commission to oversee continuity of service in the transportation of natural gas in interstate commerce. The information collected under FERC-576 notifies the Commission of: (1) Damage to jurisdictional natural gas facilities as a result of a hurricane, earthquake, or other natural disaster, or terrorist activity, (2) serious interruptions to service, and (3) damage to jurisdictional natural gas facilities due to natural disaster or terrorist activity, that creates the potential for serious delivery problems on the pipeline's own system or the pipeline grid.

Filings (in accordance with the provisions of section 4(d) of the NGA)<sup>2</sup> must contain information necessary to advise the Commission when a change in service has occurred. Section 7(d) of the NGA<sup>3</sup> authorizes the Commission to issue a temporary certificate in cases of emergency to assure maintenance of

adequate service or to serve particular customers, without notice or hearing.

Respondents to the FERC-576 are encouraged to submit the reports by email to *pipelineoutage@ferc.gov* but also have the option of faxing the reports to the Director of the Division of Pipeline Certificates. 18 CFR 260.9(b) requires that a report of service interruption or damage to natural gas facilities state: (1) The location of the service interruption or damage to natural gas pipeline or storage facilities; (2) The nature of any damage to pipeline or storage facilities; (3) Specific identification of the facilities damaged; (4) The time the service interruption or damage to the facilities occurred; (5) The customers affected by the service interruption or damage to the facilities; (6) Emergency actions taken to maintain service; and (7) Company contact and telephone number. The Commission may contact pipelines reporting damage or other pipelines to determine availability of supply, and if necessary, authorize transportation or construction of facilities to alleviate constraints in response to these reports.

A report required by 18 CFR 260.9(a)(1)(i) of damage to natural gas facilities resulting in loss of pipeline

throughput or storage deliverability shall be reported to the Director of the Commission's Division of Pipeline Certificates at the earliest feasible time when pipeline throughput or storage deliverability has been restored.

In any instance in which an incident or damage report involving jurisdictional natural gas facilities is required by Department of Transportation (DOT) reporting requirements under the Natural Gas Pipeline Safety Act of 1968, a copy of such report shall be submitted to the Director of the Commission's Division of Pipeline Certificates, within 30 days of the reportable incident<sup>4</sup>.

If the Commission failed to collect these data, it would lose the ability to monitor and evaluate transactions, operations, and reliability of interstate pipelines and perform its regulatory functions. These reports are kept by the Commission Staff as non-public information and are not made part of the public record.

*Type of Respondents:* Natural gas companies

*Estimate of Annual Burden*<sup>5</sup>: The Commission estimates the annual public reporting burden for the information collection as:

FERC-576: REPORT OF SERVICE INTERRUPTIONS

	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden and cost per response <sup>6</sup> (4)	Total annual burden hours and total annual cost (3) * (4) = (5)	Cost per respondent (\$) (5) ÷ (1)
Submittal of Original Email/Fax .....	22	2	44	1 \$72	44 \$3,168	\$72
Submittal of Damage Report .....	22	2	44	0.25 \$18	11 \$198	18
Submittal of DOT Incident Report .....	22	1	22	0.25 \$18	5.5 \$99	18
<b>Total</b> .....	.....	.....	.....	60.5 \$3,465	108	.....

<sup>1</sup> Public Law 75 688; 15 U.S.C. 717 & 717w.

<sup>2</sup> (15 U.S.C. 717c).

<sup>3</sup> (15 U.S.C. 717f).

<sup>4</sup> 18 CFR 260.9(d).

<sup>5</sup> The Commission defines burden as the total time, effort, or financial resources expended by

persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

<sup>6</sup> The estimates for cost per response are derived using the following formula: Average Burden Hours

per Response \* \$72.00 per Hour = Average Cost per Response. The hourly cost figure comes from the FERC average salary (\$149,489/year). Commission staff believes the FERC average salary to be representative wage for industry respondents.

*Comments:* Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

### Federal Energy Regulatory Commission

[Docket No. RM93-11-000]

#### Revisions to Oil Pipeline Regulations Pursuant to the Energy Policy Act of 1992; Notice of Annual Change in the Producer Price Index for Finished Goods

The Commission's regulations include a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The Commission bases the index system, found at 18 CFR 342.3, on the annual change in the Producer Price Index for Finished Goods (PPI-FG), plus two point six five percent (PPI-FG + 2.65). The Commission determined in an *Order Establishing Index For Oil Price Change Ceiling Levels*,<sup>1</sup> issued December 16, 2010, that PPI-FG + 2.65 is the appropriate oil pricing index factor for pipelines to use for the five-year period commencing July 1, 2011.

The regulations provide that the Commission will publish annually, an index figure reflecting the final change in the PPI-FG, after the Bureau of Labor Statistics publishes the final PPI-FG in May of each calendar year. The annual average PPI-FG index figures were 196.6 for 2013 and 200.4 for 2014.<sup>2</sup>

<sup>1</sup> 133 FERC ¶ 61,228 at P 1 (2010).

<sup>2</sup> Bureau of Labor Statistics (BLS) publishes the final figure in mid-May of each year. This figure is publicly available from the Division of Industrial Prices and Price Indexes of the BLS, at 202-691-7705, and in print in August in Table 1 of the annual data supplement to the BLS publication *Producer Price Indexes* via the Internet at <http://www.bls.gov/ppi/home.htm>. To obtain the BLS data, scroll down to "PPI Databases" and click on "Top Picks" of the Commodity Data including "headline" FD-ID indexes (Producer Price Index—PPI). At the next screen, under the heading "Producer Price Index Commodity Data," select the box, "Finished goods—WPUSOP3000," then scroll to the bottom of this screen and click on Retrieve data.

Thus, the percent change (expressed as a decimal) in the annual average PPI-FG from 2013 to 2014, plus 2.65 percent, is positive 0.045829.<sup>3</sup> Oil pipelines must multiply their July 1, 2014, through June 30, 2015, index ceiling levels by positive 1.045829<sup>4</sup> to compute their index ceiling levels for July 1, 2015, through June 30, 2016, in accordance with 18 CFR 342.3(d). For guidance in calculating the ceiling levels for each 12 month period beginning January 1, 1995,<sup>5</sup> see *Explorer Pipeline Company*, 71 FERC ¶ 61,416 at n.6 (1995).
