Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Evaluation of the Pell Grant Experiments Under the Experimental Sites Initiative.

*OMB Control Number:* 1850-0892.

*Type of Review:* An extension of an existing information collection.

*Respondents/Affected Public:* Individuals or Households.

*Total Estimated Number of Annual Responses:* 4,904.

*Total Estimated Number of Annual Burden Hours:* 2,416.

*Abstract:* The Pell Grant Experiments evaluation is a two-part, seven-year demonstration study sponsored by the U.S. Department of Education that focuses on the effects of expanded access to Pell grants on students' educational outcomes, employment and earnings. The primary outcome of interest is (1) educational enrollment and completion, and (2) measures of student debt and financial aid while secondary outcomes include (3) the employment status and earnings of students who participate in the study.

This study consists of two experiments, each of which will examine the impact of a single change to the Pell grant eligibility criteria. The first experiment will relax the prohibition on receipt of Pell grants by students with a bachelors' degree. Individuals eligible for the first experiment must have a bachelor's degree, be unemployed or underemployed, and pursue a vocational training program up to one year in duration. The second experiment will reduce the minimum duration and intensity levels of programs that Pell grant recipients must participate in from 15 weeks with 600 minimum clock hours to 8 weeks with 150 minimum clock hours. Each experiment will operate through a set of PGE schools that provide education and training services that qualify as PGE programs.

Participants in both experiments will be randomly assigned to either (1) a treatment group, which will have expanded access to Pell grants; or (2) a control group, which will not have access. Within both experiments, the treatment group will be very similar to the control at the time of random assignment except for access to Pell grants. Subsequent differences in the employment and earnings outcomes between treatment and control group members can then be attributed to Pell grant access. The first experiment will involve roughly 27 PGE schools with an average of 25 students participating per school. The second experiment will involve roughly 27 PGE schools with an average of 100 participating students per school. The expected sample of both experiments combined is approximately 3,375 students. Data for this evaluation will come from participants' FAFSA applications, PGE school administrative records, and SSA earnings statements. The study participant enrollment period

is expected to last from November 2012 to June 2016. A data extracts from FAFSA applications will occur in July 2018. Administrative data extracts from PGE schools will occur between January and March during years 2015-2018.

Dated: May 21, 2015.

**SUPPLEMENTARY INFORMATION:**

*Title:* FERC-725G (Mandatory Reliability Standards for the Bulk-Power System: PRC Standards).

*OMB Control No.:* 1902-0252.

*Type of Request:* Three-year extension of the FERC-725G information collection requirements as modified in Docket No. RD15-2.

*Abstract:* The Commission is submitting Reliability Standard PRC-006-2 to OMB under FERC-725G<sup>1</sup> for review of the reporting and recordkeeping requirements.

The Commission requires the information collected by the FERC-725G to implement the statutory provisions of section 215 of the Federal Power Act (FPA).<sup>2</sup> On August 8, 2005, Congress enacted into law the Electricity Modernization Act of 2005, which is Title XII, Subtitle A, of the Energy Policy Act of 2005 (EPAct 2005).<sup>3</sup> EPAct 2005 added a new section 215 to the FPA, which required a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, which are subject to Commission review and approval. Once approved, the Reliability Standards may be enforced by the ERO subject to Commission oversight, or the Commission can independently enforce Reliability Standards.<sup>4</sup>

On February 3, 2006, the Commission issued Order No. 672, implementing section 215 of the FPA.<sup>5</sup> Pursuant to Order No. 672, the Commission certified one organization, North American Electric Reliability Corporation (NERC),

<sup>1</sup> In 2012, the Commission initially approved Reliability Standard PRC-006-1. *Automatic Underfrequency Load Shedding and Load Shedding Plans Reliability Standards*, Order No. 763, 139 FERC ¶ 61,098, *order granting clarification*, 140 FERC ¶ 61,164 (2012). The Commission included Reliability Standard PRC-006-1 under FERC-725A (OMB Control No. 1902-0244). The entire burden associated with Reliability Standard PRC-006-2 (for new requirements as well as those unchanged from PRC-006-1) will be added to FERC-725G. In the future, the burden (an estimated 12,672 hours) associated with Reliability Standard PRC-006-1 will be removed from FERC-725A, to remove the temporary double counting of those hours.
