All four of these EISs are part of a total of 15 separate EISs that make up the BLM

Management decisions made as a result of these Proposed LUPAs/Final EISs will apply only to BLM-administered and National Forest System lands in the planning area. The planning areas for all four EISs includes approximately 194.0 million acres of BLM, National Park Service, Forest Service, U.S. Bureau of Reclamation, State, tribal, local, and private lands located in 28 Idaho counties (Ada, Adams, Bear Lake, Bingham, Blaine, Bonneville, Butte, Camas, Caribou, Cassia, Clark, Custer, Elmore, Fremont, Gem, Gooding, Jefferson, Jerome, Lemhi, Lincoln, Madison, Minidoka, Oneida, Owyhee, Payette, Power, Twin Falls, and Washington), 7 Montana counties

(Montana, Beaverhead, Deer Lodge, Fremont, Clark, Madison, and Silver Bow), 16 Nevada counties (Carson City, Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lincoln, Lyon, Mineral, Nye, Pershing, Storey, Washoe, and White Pine), 5 California counties (Lassen, Modoc, Plumas, Siskiyou, and Sierra), 8 Oregon counties (Baker, Crook, Deschutes, Grant, Harney, Lake, Malheur, and Union), 24 Utah counties (Beaver, Box Elder, Cache, Carbon, Daggett, Duchesne, Emery, Garfield, Grand, Iron, Juab, Kane, Morgan, Piute, Rich, Sanpete, Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Wayne, and Weber), and 2 Wyoming counties (Sweetwater and Uinta). The decision area for these Proposed LUPAs/Final EISs is defined as those BLM-administered and National Forest System lands and Federal mineral estate within the following habitat management categories:

- Priority Habitat Management Area (PHMA)—Areas identified as having the highest conservation value for maintaining sustainable GRSG populations; includes breeding, late brood-rearing, and winter concentration areas.

- Important Habitat Management Area (IHMA) (applicable to Idaho only)—Areas identified as having generally moderate to high conservation value habitat and/or populations that provide a management buffer for the PHMA and to connect patches of PHMA.

- General Habitat Management Area (GHMA)—Areas of seasonal or year-round GRSG habitat outside of PHMAs.

The Notice of Intent (NOI) to prepare the Idaho and Southwestern Montana, Nevada and Northeastern California, Oregon, and Utah Greater Sage-Grouse LUPAs/EISs was published in the **Federal Register** on December 9, 2011. A Notice of Availability (NOA) for the Idaho and Southwestern Montana, Nevada and Northeastern California, and Utah Draft LUPAs/EISs was published in the **Federal Register** on November 1, 2013. The Oregon Draft LUPA/EIS was released to the public on November 26, 2013. Comments on the Draft LUPAs/EISs received from the public and internal BLM and Forest Service review were considered and incorporated, as appropriate, into the Proposed Plan.

The alternatives presented in Proposed LUPAs/Final EISs are described below:

- Alternative A would retain the current management goals, objectives and direction specified in the existing

BLM RMPs and the Forest Service LRMPs.

- Alternative B is based on the conservation measures developed by the National Technical Team (NTT) planning effort in Washington Office Instructional Memorandum (IM) Number 2012–044. As directed in the IM, the conservation measures developed by the NTT must be considered and analyzed, as appropriate, through the land use planning process and NEPA by all BLM state and field offices that contain occupied GRSG habitat. Most management actions included in Alternative B would be applied to PHMA.

- Alternative C is based on a citizen groups' recommended alternative. This alternative emphasizes improvement and protection of habitat for GRSG and is applied to all occupied GRSG habitat. Alternative C would limit commodity development in areas of occupied GRSG habitat, and would close or designate portions of the planning area to some land uses. The Utah LUPA/Draft EIS combined this alternative with Alternative F (discussed below).

- Alternative D, which was identified as the Preferred Alternative in the Draft EIS, balances opportunities to use and develop the planning area and protects GRSG habitat based on scoping comments and input from Cooperating Agencies involved in the alternatives development process. Protective measures would be applied to GRSG habitat.

- Alternative E is the alternative provided by the State or Governor's offices for inclusion and analysis in the EISs. It incorporates guidance from specific State Conservation strategies and emphasizes management of greater sage-grouse seasonal habitats and maintaining habitat connectivity to support population objectives. This alternative was identified as a co-Preferred Alternative in the Idaho and Southwestern Montana Draft EIS.

- Alternative F is also based on a citizen group recommended alternative. This alternative emphasizes improvement and protection of habitat for GRSG and defines different restrictions for PHMA and GHMA. Alternative F would limit commodity development in areas of occupied GRSG habitat, and would close or designate portions of the planning area to some land uses. This alternative does not apply to the Utah sub-regional planning effort, as it was combined with Alternative C.

- The Proposed LUPA incorporates guidance from specific State Conservation strategies, as well as

additional management based on the NTT recommendations. This alternative emphasizes management of GRSG seasonal habitats and maintaining habitat connectivity to support population objectives.

The BLM and Forest Service received approximately 4,990 substantive comments, contained in 74,240 submissions during the four Draft EISs' comment periods. Based on comments received during the NEPA process, the following comment topics were frequently identified:

- General (Process/Policy);
- Lands and Realty;
- Livestock Grazing;
- Minerals and Energy;
- Predation;
- Recreation;
- Socioeconomic;
- Special Management Area

Designations;

- Special Status Species (Including GRSG);
- Travel and Access Management;
- Vegetation;
- Wildland Fire Management;
- Wildlife and Fisheries.

For the Idaho and Southwestern Montana GRSG Proposed LUPA/Final EIS, the BLM and Forest Service conducted seven public meetings. These meetings were held in Murphy, Idaho Falls, Salmon, Pocatello, Twin Falls, and Boise in Idaho and Dillon in Montana during January 2014. For the Nevada and Northeastern California GRSG Proposed LUPA/Final EIS, the BLM and Forest Service conducted seven public meetings. These meetings were held in Cedarville and Susanville, California, and in Reno, Tonopah, Ely, Elko, and Winnemucca, Nevada in early December 2013. For the Oregon GRSG Proposed LUPA/Final EIS, the BLM conducted seven public meetings. These meetings were held in Baker City, Burns, Durkee, Jordan Valley, Lakeview, Ontario and Prineville, Oregon during January 2014. For the Utah GRSG Proposed LUPA/Final EIS, the BLM and Forest Service conducted eight public meetings. These meetings were held in Cedar City, Panguitch, Price, Randolph, Richfield, Salt Lake City, Snowville, and Vernal, Utah during November and December 2013. Comments on the Draft LUPAs/Draft EISs received from the public and internal BLM and Forest Service review were carefully considered and incorporated as appropriate into the proposed LUPAs/Final EISs. The BLM and Forest Service, via the Western Association of Fish and Wildlife Agencies (WAFWA) Management Zone Greater Sage-Grouse Conservation Team, will develop a Regional Mitigation Strategy to guide

the application of the mitigation hierarchy to address impacts within that Zone. The Regional Mitigation Strategy should consider any State-level GRSG mitigation guidance that is consistent with the requirements. The Regional Mitigation Strategy will be developed in a transparent manner, based on the best science available and standardized metrics.

SUPPLEMENTARY INFORMATION: The planning area includes lands within the BLM Billings Field Office’s administrative boundaries, including Carbon, Golden Valley, Musselshell, Stillwater, Sweet Grass, Wheatland, and Yellowstone Counties in Montana, and portions of Big Horn County, Montana and Big Horn County, Wyoming. The planning area includes all lands, regardless of jurisdiction, totaling approximately 10.37 million acres; however, the BLM will only make decisions on lands that fall under the BLM’s jurisdiction. The BLM decision area is comprised of approximately 434,154 acres of the surface estate in the planning area and 889,479 acres of Federal mineral estate. The revised RMP will replace the 1984 Billings RMP, as amended. The Draft RMP/EIS was made available for public review for a 90-day period on March 29, 2013 (78 FR 19291). The Draft RMP/EIS included a series of management actions, within four management alternatives, designed to address management challenges and issues raised during scoping. These included, but were not limited to, trails and travel management, wildlife habitat management including that of the Greater Sage-Grouse, energy development (coal and oil and gas), livestock grazing, recreation, lands with wilderness characteristics, special management areas including Areas of Critical Environmental Concern (ACEC) and the Pryor Mountain Wild Horse Range, and management of the cultural and historic resources at Pompeys Pillar National Monument. In accordance with 43 CFR 1610.7–2(b), the Notice of Availability for the Draft RMP/EIS announced a concurrent public comment period on proposed ACECs.

Comments on the Draft RMP/Draft EIS received from the public and internal BLM review were considered and incorporated as appropriate into the Proposed RMP/Final EIS which analyzes four alternatives:
