

fifth year. Some sources revised and resubmitted their RMPs between the five-year deadlines, because of changes occurring at the source that triggered an earlier resubmission. These sources were then assigned a new five-year compliance deadline based on the date of their most recent revised plan submission. However, since most sources are not required to resubmit earlier than their five-year compliance deadline, the next RMP submission deadline for most sources occurs in 2019. The remaining sources have been assigned a different deadline in 2016, 2017, 2018, or 2020 based on the date of their most recent submission. Only the first three years are within the period covered by this ICR.

In this ICR, EPA has accounted for burden for new sources that may become subject to the regulations, currently covered sources with compliance deadlines in this ICR period (2016 to 2018), sources that are out of compliance since the last regulatory deadline but are expected to comply during this ICR period, and sources that have deadlines beyond this ICR period but are required to comply with certain prevention program documentation requirements during this ICR period.

Form numbers: Risk Management Plan Form: EPA Form 8700-25; CBI Substantiation Form: EPA Form 8700-27; CBI Unsanitized Data Element Form: EPA Form 8700-28.

Respondents/affected entities: Entities potentially affected by this action are chemical manufacturers, petroleum refineries, water treatment systems, agricultural chemical distributors, refrigerated warehouses, chemical distributors, non-chemical manufacturers, wholesale fuel distributors, energy generation facilities, etc.

Respondent's obligation to respond: Mandatory (40 CFR part 68).

Estimated number of respondents: 12,600 (total).

Frequency of response: Sources must resubmit RMPs at least every five years and update certain on-site documentation more frequently.

Total estimated burden: 80,546 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$6,736,212 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in estimates: The above burden estimates are based on the current approved ICR. In the final notice for the renewed ICR, EPA will publish revised burden estimates based on updates to respondent data and unit costs. The revised burden estimates may decrease slightly from the current ICR,

as the total universe of respondents has decreased slightly, and also because the new ICR period will not include a major (five-year) reporting cycle year. The most recent five-year reporting cycle year was 2014, which is covered by the current approved ICR. The next major five-year reporting cycle year is 2019, which is after the period covered by the new ICR. However, wage inflation may offset this decrease or even result in a marginal increase in burden compared with the ICR currently approved by OMB.

Acting Director, Office of Emergency Management.
