

and the NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

## II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* NRC Form 748, National Source Tracking Transaction Report.  
2. *OMB approval number:* 3150-0202.  
3. *Type of submission:* Extension.  
4. *The form number, if applicable:* NRC Form 748.

5. *How often the collection is required or requested:* On occasion (at completion of a transaction, and at inventory reconciliation).

6. *Who will be required or asked to respond:* Licensees that manufacture, receive, transfer, disassemble, or dispose of nationally tracked sources.

7. *The estimated number of annual responses:* 20,306 (13,200 online + 480 batch upload + 6,626 NRC Form 748).

8. *The estimated number of annual respondents:* 1,400 (260 NRC Licensees + 1,140 Agreement State Licensees).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 2,209.7.

10. *Abstract:* In 2006, the NRC amended its regulations to implement a National Source Tracking System (NSTS) for certain sealed sources. The amendments require licensees to report certain transactions involving nationally tracked sources to the NSTS. These transactions include manufacture, transfer, receipt, disassembly, or disposal of the nationally tracked source. This information collection is mandatory and is used to populate the NSTS. National source tracking is part of a comprehensive radioactive source control program for radioactive materials of greatest concern. The NRC and Agreement States use the information provided by licensees in the NSTS to track the life cycle of the

nationally tracked source from manufacture through shipment receipt, decay, and burial. NSTS enhances the ability of NRC and Agreement States to conduct inspections and investigations, communicate information to other government agencies, and verify legitimate ownership and use of nationally tracked sources.

## III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 10th day of June 2015.

For the Nuclear Regulatory Commission.
