SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR part 1320, which implement provisions of the Paperwork Reduction Act, 44 U.S.C. 3501-3521, require that interested members of the public and affected agencies be given an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d) and 1320.12(a)). This notice identifies an information collection that the BLM plans to submit to OMB for approval. The Paperwork Reduction Act provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

The BLM will request a 3-year term of approval for this information collection activity. Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany our submission of the information collection requests to OMB.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Establishment of a New Recreation Fee Area at Minuteman Missile National Historic Site

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service plans to establish fees for the tour of the Launch Control Facility Delta-01. The proposed amenity fee is intended to provide enhanced tour reservation services through the Recreation.gov system. This reservation service would replace the existing first-come first-serve system for providing tour tickets. The park will use the revenue to fund preservation maintenance requirements of the Launch Control Facility Delta-01 site, potentially increase staff to accommodate the increase in visitation and implement a tour reservation system through Recreation.gov.

DATES: We will begin collecting fees on December 16, 2015.

FOR FURTHER INFORMATION CONTACT: Eric Leonard, Superintendent, Minuteman Missile National Historic Site, 24545 Cottonwood Road, Philip, South Dakota 57567; telephone (605) 433-5552; or by email at eric_leonard@nps.gov.

SUPPLEMENTARY INFORMATION: This notice is to comply with Section 804 of the Federal Lands Recreation Enhancement Act of 2004 (Pub. L. 108-447). The act requires agencies to give the public 6 months advance notice of the establishment of a new recreation fee area. The guided tour fee structure will be \$6 per adult; \$4 for ages 13 to

16; and no charge for children 12 years of age and under. The Delta-09 Missile Launch Facility (missile silo), including self-guided and limited guided tours, will remain a fee-free area. These fees were determined through a comparability study of similar sites in the area at Federal, state, and private recreation areas. In accordance with NPS public involvement guidelines, the park engaged numerous individuals, organizations, and local, state, and Federal government representatives while planning for the implementation of this fee.

Dated: April 28, 2015.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR 282, *Operations in the Outer Continental Shelf for Minerals Other than Oil, Gas, and Sulphur.*

OMB Control Number: 1014-0021.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1334 and 43 U.S.C. 1337(k)), authorizes the Secretary of the Interior to implement regulations to grant leases of any mineral other than oil, gas, and sulphur to qualified parties. This regulation governs mining operations within the OCS and establishes a comprehensive leasing and regulatory program for such minerals. This regulation has been designed to: (1) Recognize the differences between the OCS activities associated with oil, gas, and sulphur discovery and development and those associated with the discovery and development of other minerals; (2) facilitate participation by States directly

affected by OCS mining activities; (3) provide opportunities for consultation and coordination with other OCS users and uses; (4) balance development with environmental protection; (5) insure a fair return to the public; (6) preserve and maintain free enterprise competition; and (7) encourage the development of new technology.

The authorities and responsibilities described above are among those delegated to the Bureau of Safety and Environmental Enforcement (BSEE). Therefore, this ICR addresses the regulations at 30 CFR 282, Operations in the Outer Continental Shelf for Minerals Other than Oil, Gas, and Sulphur. It should be noted that there has been no activity in the OCS for minerals other than oil, gas and sulphur for many years and no information collected. However, because these are regulatory requirements, the potential exists for information to be collected; therefore, we are renewing this collection of information.

Responses are mandatory or are required to obtain or retain a benefit. No questions of a sensitive nature are asked. The BSEE protects information considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and DOIs implementing regulations (43 CFR 2), and under the regulations at and §§ 282.5, 282.6, and 282.7.

BSEE will use the information required by 30 CFR 282 to determine if lessees are complying with the regulations that implement the mining operations program for minerals other than oil, gas, and sulphur. Specifically, BSEE will use the information:

- To ensure that operations for the production of minerals other than oil, gas, and sulphur in the OCS are conducted in a manner that will result in orderly resource recovery,

development, and the protection of the human, marine, and coastal environments.

- To ensure that adequate measures will be taken during operations to prevent waste, conserve the natural resources of the OCS, and to protect the environment, human life, and correlative rights.

- To determine if suspensions of activities are in the national interest, to facilitate proper development of a lease including reasonable time to develop a mine and construct its supporting facilities, and to allow for the construction or negotiation for use of transportation facilities.

- To identify and evaluate the cause(s) of a hazard(s) generating a suspension, the potential damage from a hazard(s) and the measures available to mitigate the potential for damage.

- For technical evaluations that provide a basis for BSEE to make informed decisions to approve, disapprove, or require modification of the proposed activities.

Frequency: On occasion and as required by regulations.

Description of Respondents: Potential respondents comprise OCS Federal oil, gas, or sulphur lessees and/or operators.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this information collection is a total of 56 hours and \$100,000 non-hour cost burdens. The following chart details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

Estimated Reporting and Recordkeeping Non-Hour Cost Burden:
We have identified one non-hour cost burden associated with the collection of information for a total of \$100,000. There is a cost to industry to submit site-specific study plan and the results. We have not identified any other non-

hour cost burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a

collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.*) requires each agency “. . . to provide notice . . . and otherwise consult with members of the public and affected agencies concerning each proposed

collection of information . . .” Agencies must specifically solicit comments to: (a) Evaluate whether the collection is necessary or useful; (b) evaluate the accuracy of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of technology.

To comply with the public consultation process, on March 26, 2015, we published a **Federal Register** notice (80 FR 16019) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day comment period. In addition, § 282.0 provides the OMB Control Number for the information collection requirements imposed by the 30 CFR 282, regulations. The regulation also informs the public that they may comment at any time on the collections of information and provides the address to which they should send comments. We received four comments in response to the **Federal Register**. None of the comments received were germane to the paperwork burden of this information collection renewal.

Public Availability of Comments: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: May 27, 2015.
