

inspector before being repaired using the drop table on a track designated for minor repairs. CP will continue to perform SCABTs as required in sections 232.305(b)(1), (4), (5) and 232.305(c)–(e). CPR states that this request is consistent with 49 CFR 232.303(a)(2) which allows for an exception to the definition of “major repair” for wheels changed on an intermodal loading ramp. Similar to changing wheels on an intermodal loading ramp, wheel replacements using a drop table are completed in a short period of time and with no disruption to the other car components, including the brake system. The wheelset change-out takes an average of 0.337 person-hours. Besides the drop table, the repair requires only the use of hand tools and does not require additional specialized equipment.
