The area described includes both public and non-public lands and aggregates 3,581.27 acres.

Consistent with Federal regulations under NEPA and the Mineral Leasing Act of 1920, as amended, the BLM must prepare an environmental analysis prior to holding a competitive Federal coal lease sale. The Supplemental Draft EIS analyzes and discloses to the public the direct, indirect, and cumulative environmental impacts of issuing a Federal coal lease on the Alton Coal Tract, including mining and transportation of coal to a railhead near Cedar City, Utah. A copy of the Supplemental Draft EIS has been sent to affected Federal, State, tribal, and local government agencies; persons and entities identified as potentially being affected by a decision to lease the Alton Coal Tract; and, persons who indicated to the BLM that they wished to receive a copy of the Supplemental Draft EIS.

The Supplemental Draft EIS analyzes three action alternatives (Alternatives B, C, and K1) and a No Action Alternative. Under the action alternatives, a competitive sale would be held and a lease issued for the Federal coal included in the specific tracts considered under those alternatives.

In addition to its analysis of alternatives and consistent with the Kanab Field Office Record of Decision and Approved Resource Management Plan (2008), the Supplemental Draft EIS

reflects the BLM's application of the unsuitability criteria (43 CFR 3461.5) to the Alton Coal Tract. Based on that review, the BLM has determined the Alton Coal Tract is unsuitable under Criterion 15 (43 CFR 3461.5) based on the presence of sage-grouse dancing and strutting grounds on and around the tract. The BLM will continue to consider the tract for leasing because under Criterion 15, "A lease may be issued if, after consultation with the State, the BLM determines that all or certain stipulated methods of coal mining will not have a significant long-term impact on the species being protected." As part of that determination, the BLM will consider all available data related to the impacts of the project, including comments from cooperators and the public. All action alternatives in the Supplemental Draft EIS require implementation of a detailed Sage-Grouse Mitigation Plan that imposes, among other things, a 4:1 offsite mitigation ratio. The Sage-Grouse Mitigation Plan also includes reclamation of surrounding sagebrush habitats to vegetation standards that would provide for sage-grouse habitat, as well as treating a 186-acre area prior to ground disturbance on the leased tract.

The alternatives being considered in the Supplemental Draft EIS are in conformance with the Kanab Field Office Record of Decision and Approved Resource Management Plan (2008). Requests to be included on the mailing list for this project may be sent by mail, facsimile, or electronically to the addresses listed in the **ADDRESSES** section above. For those submitting comments on the Supplemental Draft EIS, please make the comments as specific as possible with reference to page numbers and sections of the document. Comments that contain only opinions or preferences will not receive a formal response; however, they may be considered and included as part of the BLM decision-making process.

Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the Kanab Field Office (address listed above) during regular business hours (8 a.m. to 4:30 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.
