SUPPLEMENTARY INFORMATION:

I. Abstract

Section 4 of the Endangered Species
 Act (ESA) (16 U.S.C. 1531 *et seq.*)
 specifies the process by which we can
 list species as threatened or endangered.
 When we consider whether or not to list
 a species, the ESA requires us to take
 into account the efforts being made by
 any State or any political subdivision of
 a State to protect such species. We also
 take into account the efforts being made
 by other entities. States or other entities
 often formalize conservation efforts in
 conservation agreements, conservation
 plans, management plans, or similar
 documents. The conservation efforts
 recommended or called for in such
 documents could prevent some species
 from becoming so imperiled that they
 meet the definition of a threatened or
 endangered species under the ESA.

The Policy for Evaluation of
 Conservation Efforts When Making
 Listing Decisions (PECE) (68 FR 15100,
 March 28, 2003) encourages the
 development of conservation
 agreements/plans and provides certainty

about the standard that an individual
 conservation effort must meet in order
 for us to consider whether it contributes
 to forming a basis for making a decision
 about the listing of a species. PECE
 applies to "formalized conservation
 efforts" that have not been implemented
 or have been implemented but have not
 yet demonstrated if they are effective at
 the time of a listing decision.

Under PECE, formalized conservation
 efforts are defined as conservation
 efforts (specific actions, activities, or
 programs designed to eliminate or
 reduce threats or otherwise improve the
 status of a species) identified in a
 conservation agreement, conservation
 plan, management plan, or similar
 document. To assist us in evaluating a
 formalized conservation effort under
 PECE, we collect information such as
 conservation plans, monitoring results,
 or progress reports. The development of
 such agreements/plans is voluntary.
 There is no requirement that the
 individual conservation efforts included
 in such documents be designed to meet
 the standard in PECE. The PECE policy
 is posted on our Candidate Conservation
 Web site at [http://www.fws.gov/
 endangered/esa-library/pdf/PECE-
 final.pdf](http://www.fws.gov/endangered/esa-library/pdf/PECE-final.pdf).

SUPPLEMENTARY INFORMATION:

I. Abstract

This notice concerns the collection of information that is sufficient and relevant to evaluate and select proposals for funding under the NGDPP. We will accept proposals from State geological surveys requesting funds to (1) inventory, assess, and preserve the condition of geoscientific collections and individual physical samples, (2) create metadata for individual samples and collections, (3) create or update digital infrastructure, including data migration to contemporary formats to assure data are not lost due to recording media degradation or changing data recording formats or software programs; and (4) rescue data at risk. Financial assistance will be awarded annually on a competitive basis following the evaluation and ranking of State proposals by a review panel composed of representatives from the Department of the Interior, State geological surveys, academic institutions, and the private sector. To submit a proposal, respondents must complete a project narrative and submit the application via www.grants.gov. Grant recipients must complete a final technical report at the end of the project period. Narrative and report guidance is available through <http://datapreservation.usgs.gov> and at www.grants.gov.
