SUPPLEMENTARY INFORMATION:

I. Abstract

This notice concerns the collection of information that is sufficient and relevant to evaluate and select proposals for funding under the NGDPP. We will accept proposals from State geological surveys requesting funds to (1) inventory, assess, and preserve the condition of geoscientific collections and individual physical samples, (2) create metadata for individual samples and collections, (3) create or update digital infrastructure, including data migration to contemporary formats to assure data are not lost due to recording media degradation or changing data recording formats or software programs; and (4) rescue data at risk. Financial assistance will be awarded annually on a competitive basis following the evaluation and ranking of State proposals by a review panel composed of representatives from the Department of the Interior, State geological surveys, academic institutions, and the private sector. To submit a proposal, respondents must complete a project narrative and submit the application via www.grants.gov. Grant recipients must complete a final technical report at the end of the project period. Narrative and report guidance is available through <http://datapreservation.usgs.gov> and at www.grants.gov.
