using when considering new or amended energy conservation standards for fluorescent lamp ballasts. The focus of the public meeting noted above will be to discuss the information presented and issues identified in the Framework Document. At the public meeting, DOE will make presentations and invite discussion on the rulemaking process as it applies to fluorescent lamp ballasts. DOE will also solicit comments, data, and information from participants and other interested parties.

DOE is planning to conduct in-depth technical analyses in the following areas: (1) Engineering; (2) energy use; (3) product price; (4) life-cycle cost and payback period; (5) national impacts; (6) manufacturer impacts; (7) emission impacts; (8) utility impacts; (9) employment impacts; and (10) regulatory impacts. DOE will also conduct several other analyses that support those previously listed, including the market and technology assessment, the screening analysis, and the shipments analysis (which contribute to the national impact analysis).

After the public meeting and the close of the comment period on the Framework Document, DOE will collect data, conduct the analyses as discussed in the Framework Document and at the public meeting, and review the public comments it receives.

DOE considers public participation to be a very important part of the process for determining whether to establish or amend energy conservation standards and, if so, in setting those new or amended standards. DOE actively encourages the participation and interaction of the public during the comment period at each stage of the rulemaking process. Beginning with the Framework Document, and during each subsequent public meeting and comment period, interactions with and among members of the public provide a balanced discussion of the issues to assist DOE in the standards rulemaking process. Accordingly, anyone who wishes to participate in the public meeting, receive meeting materials, or be added to the DOE mailing list to receive future notices and information about this rulemaking should contact Ms. Brenda Edwards at (202) 566–2945, or via email at Brenda.Edwards@ee.doe.gov.

SUPPLEMENTARY INFORMATION: On September 4, 2014, FCA published a proposed rule to revise our regulatory capital requirements for Farm Credit System (System) institutions to establish tier 1/tier 2 risk-based capital ratio requirements (replacing core surplus and total surplus ratios), a tier 1
leverage ratio requirement (replacing a net collateral requirement for System banks), a capital conservation buffer, revised risk weightings, and additional publish disclosure requirements. The revisions to the risk weightings would include replacing references to credit ratings with alternative risk measurements, as required by the Dodd-Frank Wall Street Reform and Consumer Protection Act. The comment period on the proposed rule, after an extension, closed February 16, 2015.2

FCA received a letter dated March 30, 2015, from the Farm Credit Council, a trade association representing System institutions, requesting FCA to reopen the comment period. The Farm Credit Council stated that the reason for its request was to give System institutions the opportunity to meet with FCA Board members that joined the FCA Board on March 13 and 17, 2015, in order to discuss the proposed rule. In response to this request, we are reopening the comment period on June 26 through July 10, 2015. Because the proposed rule contains significant revisions to the regulatory capital framework in existing FCA regulations, we believe it is important to give interested parties additional time to provide comments to the FCA Board. Reopening the comment period will ensure transparency in the process.

Dated: June 17, 2015.

Dale L. Aultman,
Secretary, Farm Credit Administration Board.
