Application for a Social Security Number Card, the Social Security Number Application Process (SSNAP), and Internet SSN Replacement Card

(iSSNRC) Application—20 CFR 422.103–422.110—0960–0066. SSA collects information on the SS-5 (used in the United States) and SS-5-FS (used outside the United States) to issue original or replacement Social Security cards. SSA also enters the application data into the Social Security Number Application Process (SSNAP) when applicants request a new or replacement card via telephone or in person. In addition, hospitals collect the same information on SSA’s behalf for newborn children through the Enumeration-at-Birth process. In this process, parents of newborns provide hospital birth registration clerks with information required to register these newborns. Hospitals send this information to State Bureaus of Vital Statistics (BVS), and they send the information to SSA’s National Computer Center. SSA then uploads the data to the SSA mainframe along with all other enumeration data, and we assign the newborn a Social Security number

(SSN) and issue a Social Security card. Respondents can also use these modalities to request a change in their SSN records. Additionally, the iSSNRC application will collect information similar to the paper SS-5 for no-change replacement SSN cards for adult U.S. citizens. A new iSSNRC modality included in the current clearance will allow certain applicants for an SSN replacement card to apply by completing an internet application and submitting the required evidence online rather than completing a paper Form SS-5, Application for a Social Security Card. The respondents for this collection are applicants for original and replacement Social Security cards, or individuals who wish to change information in their SSN records, who use any of the modalities described above.

Type of Request: Revision of an OMB-approved information collection.

Application scenario	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Respondents who do not have to provide parents’ SSNs	10,500,000	1	8.5	1,487,500
Adult U.S. Citizens requesting a replacement card with no changes through new iSSNRC modality*	1,500,000	1	5	125,000
Respondents whom we ask to provide parents’ SSNs (when applying for original SSN cards for children under age 18)	400,000	1	9	60,000
Applicants age 12 or older who need to answer additional questions so SSA can determine whether we previously assigned an SSN	1,500,000	1	9.5	237,500
Applicants asking for a replacement SSN card beyond the new allowable limits (i.e., who must provide additional documentation to accompany the application)	900	1	60	900
Authorization to SSA to obtain personal information cover letter	500	1	15	125
Authorization to SSA to obtain personal information follow-up cover letter	500	1	15	125
Totals	13,901,900			1,911,150

* The total timeline for complete national coverage of the iSSNRC application is two years from the date of initial implementation and is dependent on the contractor enrolling each State into the network. By fiscal year 2018, we would expect to issue about 1.5 million replacement cards annually via the iSSNRC application. However, the estimated volume could vary based on the date of implementation, when the contractor acquires States, and our marketing efforts to the public.

Cost Burden: The state BVSs incur costs of approximately \$11 million for transmitting data to SSA’s mainframe. However, SSA reimburses the states for these costs.

Dated: June 24, 2015.

Reports Clearance Officer, Social Security Administration.
