

Total estimated burden: 80,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,020,000 (per year), includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated respondent labor burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. Rather, it was due to a discrepancy identified in the previous renewal, in which the number of by-product plants conducting daily leak inspections and bypass/bleeder stack/flare system inspections was overestimated. EPA has revised the estimates in this ICR to reflect the appropriate number of by-product plants. The net result of this adjustment was a decrease in respondent burden hours. There is also a small adjustment increase in the number of responses due to a correction. The previous ICR did not account for the notification of reconstruction, notification of battery closure, and malfunction report in calculating the number of responses.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), "Fuel Use Requirements for Great Lakes Steamships" (EPA ICR No. 2458.02, OMB Control No. 2060-0679) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through August 31, 2015. An agency may not conduct or sponsor and

a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

EPA will consider the

comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The U.S. Environmental Protection Agency (EPA) adopted requirements for marine vessels operating in and around U.S. territorial waters to use reduced-sulfur diesel fuel. This requirement does not apply for steamships, but it would apply for steamships that are converted to run on diesel engines. A regulatory provision allows vessel owners to qualify for a waiver from the fuel-use requirements for a defined period for such converted vessels. EPA uses the data to oversee compliance with regulatory requirements, including communicating with affected companies and answering questions from the public or other industry participants regarding the waiver in question.

Form Numbers: None.

Estimated number of respondents: 2 (total).

Frequency of response: Once

Currently approved estimated burden: 14 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Currently approved estimated cost: \$988 (per year), includes no annualized capital or operation & maintenance costs.

Changes in Estimates: The final ICR will address all changes in the estimates over the past three years.

In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for Preparing Your Comments.** When submitting comments, remember to:

- a. Identify the public notice and docket number and other identifying information (subject heading, **Federal Register** date and page number).
- b. Follow directions—Organize comments by referencing the part of the permit or fact sheet by section number.
- c. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.
- d. Describe any assumptions and provide any technical information and/or data that you used.
- e. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- f. Provide specific examples to illustrate your concerns, and suggest alternatives.
- g. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- h. Make sure to submit your comments by the comment period deadline identified.

II. Background

These draft permits are similar to the current permits and will authorize the discharge of wastewater in accordance with the terms and conditions described therein. The fact sheet for the permits is provided for download concurrently with the permits and provides detailed information on; the decisions used to set limitations, the specific geographic areas covered by the permits, information on monitoring schedules, inspection requirements, and other regulatory decisions or requirements.

Issuance of the general permits will cover discharges from wastewater lagoon systems located in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. The general permits are grouped geographically by state, with the permit coverage being for specified Indian reservations located within a state boundary [specific permit coverage areas below]; any land held in trust by the United States for an Indian tribe; and any other areas which are Indian country within the meaning of 18 U.S.C. 1151.

III. Summary of Permits

A. Colorado: COG587###

This permit covers the Southern Ute Reservation and the Ute Mountain Reservation, including those portions of the Reservation located in New Mexico and Utah.

B. Montana: MTG589###

This permit covers the Blackfeet Indian Reservation of Montana; the Crow Indian Reservation; the Flathead Reservation; the Fort Belknap Reservation of Montana; the Fort Peck Indian Reservation; the Northern Cheyenne Indian Reservation; and, the Rocky Boy's Reservation.

C. North Dakota: NDG589###

This permit covers the Fort Berthold Reservation; the Spirit Lake Indian Reservation; the Standing Rock Sioux Reservation; and, the Turtle Mountain Reservation.

This permit includes that portion of the Standing Rock Sioux Reservation and associated Indian country located within the State of South Dakota. It does not include any land held in trust by the United States for the Sisseton-Wahpeton Oyate or any other Indian country associated with that Tribe, which is covered under general permit SDG589###.

D. South Dakota: SDG589###

This permit covers the Cheyenne River Reservation; Crow Creek Reservation; the Flandreau Santee Sioux Indian Reservation; the Lower Brule Reservation; the Pine Ridge Reservation (including the entire Reservation, which is located in both South Dakota and Nebraska); the Rosebud Sioux Indian Reservation; and, the Yankton Sioux Reservation.

This permit includes any land in the State of North Dakota that is held in trust by the United States for the Sisseton-Wahpeton Oyate or any other Indian country associated with that Tribe. It does not include the Standing Rock Sioux Reservation or any associated Indian country, which is covered under general permit NDG589###.

E. Utah: UTG589###

F. Wyoming: WYG589###

This permit covers the Wind River Reservation.

Coverage under the general permits will be limited to lagoon systems treating primarily domestic wastewater and will include two categories of coverage; discharging lagoons (DIS), and lagoons expected to have no discharge

(NODIS). The effluent limitations for discharging lagoons are based on the Federal Secondary Treatment Regulation (40 CFR part 133) and best professional judgement (BPJ). If more stringent and/or additional effluent limitations are considered necessary to comply with applicable water quality standards, etc., those limitations and their basis are explained in the permit fact sheets and will be imposed by written notification to the permittee. Lagoon systems under the no discharge category are required to have no discharge except in accordance with the bypass provisions of the permit. Self-monitoring requirements and routine inspection requirements are included in the permits.

Where the Tribes have Clean Water Act section 401(a)(1) certification authority; Flathead Indian Reservation, the Fort Peck Indian Reservation, Northern Cheyenne Indian Reservation, and the Ute Mountain Indian Reservation; EPA has requested certification that the permits comply with the applicable provisions of the Clean Water Act and tribal water quality standards.

IV. Other Legal Requirements

Economic Impact (Executive Order 12866): EPA has determined that the issuance of these general permits is not a "significant regulatory action" under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to formal OMB review prior to proposal.

Paperwork Reduction Act: EPA has reviewed the requirements imposed on regulated facilities in these proposed general permits under the Paperwork Reduction Act of 1980, 44 U.S.C. 501, *et seq.* The information collection requirements of these permits have already been approved by the Office of Management and Budget in submissions made for the NPDES permit program under the provisions of the Clean Water Act.

Unfunded Mandates Reform Act: Section 201 of the Unfunded Mandates Reform Act (UMRA), Public Law 104-4, generally requires federal agencies to assess the effects of their "regulatory actions" defined to be the same as "rules" subject to the Regulatory Flexibility Act (RFA) on tribal, state, local governments and the private sector. Since the permit proposed today is an adjudication, it is not subject to the RFA and is therefore not subject to the requirements of the UMRA.

Authority: Clean Water Act, 33 U.S.C. 1251, *et seq.*

Dated: June 9, 2015.

Darcy O'Connor,

*Acting Assistant Regional Administrator,
Office of Partnerships and Regulatory Assistance.*
