

received an application from Upland Pipeline, LLC (“Upland”) for a Presidential Permit authorizing the construction, connection, operation, and maintenance of pipeline facilities for the export of crude oil. If the application is approved, the proposed facilities will transport crude oil from the Williston Basin region in North Dakota across the U.S.-Canadian border near Burke County, North Dakota, for onward transportation to refineries in Canada and the eastern United States.

Upland is a limited liability corporation organized under the laws of the State of Delaware. The ultimate parent corporation of Upland is TransCanada Corporation (“TransCanada”). TransCanada is a major energy infrastructure firm whose assets include approximately 35,500 miles of natural gas pipelines and a 2,600-mile petroleum pipeline. Upland plans to enter into a development, management, and operations agreement with TransCanada Oil Pipeline Operations, Inc., a subsidiary of TransCanada, to provide operating services for the project.

Under E.O. 13337, the Secretary of State is designated and empowered to receive all applications for Presidential Permits for the construction, connection, operation, or maintenance, at the borders of the United States, of facilities for the exportation or importation of liquid petroleum, petroleum products, or other non-gaseous fuels to or from a foreign country. The Department of State has the responsibility to determine whether issuance of a new Presidential Permit for construction, connection, operation, and maintenance of the proposed Upland pipeline border facilities would serve the U.S. national interest.

The Department will conduct an environmental review consistent with the National Environmental Policy Act of 1969. The Department will provide more information on the review process in a future **Federal Register** notice.

Upland’s application is available at: <http://www.state.gov/e/enr/applicant/applicants/index.htm>

### Federal Aviation Administration

#### System Wide Information Management (SWIM) Interactive Developer Workshop; Meeting Announcement

**AGENCY:** Federal Aviation Administration (FAA), DOT.

#### System Wide Information Management (SWIM) Interactive Developer Workshop; Meeting Announcement

Tuesday, September 22, 2015 to Thursday, September 24, 2015—From 8:00 a.m. to 4:30 p.m., FAA Florida NextGen Test Bed, 557 Innovation Way, Daytona Beach, FL 32114.

#### Open Meeting—Interactive Workshop

The Federal Aviation Administration (FAA) invites all interested stakeholders with a background in software development to attend an interactive workshop on System Wide Information Management (SWIM) at the state of the art NextGen Test Bed in Daytona Beach, FL. Join fellow developers as the FAA introduces and demonstrates current and new data services being made available from the agency’s enterprise information gateway. Socializing new ideas on how to work with data from SWIM and what applications can be developed will be highly encouraged by the organizers.

Participants to the workshop who have an existing graphical user interface that visualizes data are encouraged to bring their application to use during the workshop. Participants that do not have an interface may be provided one at no cost. All participants must bring their own hardware (laptop preferred) to use during the event.

The FAA will be providing a connection to the Research & Development Data Domain allowing participants to engage and interact real time with data from SWIM in a non-operational environment. The following data types will be introduced and available to work with during the event:

- Notices to Airmen (NOTAM)
- Common Sourced Weather
- Terminal Data Distribution Services
- Flight Data Publication Services
- Traffic Flow Management Publication Services

Participants will be highly encouraged to introduce ideas of how they would incorporate SWIM data into their operation or application both before and after working with the data types provided. For more information or to register, visit [www.faa.gov/nextgen/swim](http://www.faa.gov/nextgen/swim).

Space is limited so register early to secure a spot! Registration will close when all spots have been filled!

### About SWIM

System Wide Information Management (SWIM) is the FAA’s data distribution backbone of NextGen, the Next Generation Air Transportation System. SWIM utilizes a “one to many” data distribution model, allowing easier access to more data, providing it to the right person, at the right time, in the format they want. SWIM utilizes industry standard service oriented architecture (SOA) technology to be interoperable with many types of applications capable of web service and java based messaging. The FAA is also leading the use of standard data exchange models such as Aeronautical Information Exchange (AIXM) and Flight Information Exchange (FIXM).
