Foreign-Trade Zone (FTZ) 46—Cincinnati, Ohio; Notification of Proposed Production Activity, Festo Corporation (Pneumatic/Electric Cylinders and Drives, Valve Manifolds, Electronic Control Systems), Mason, Ohio

Festo Corporation (Festo), an operator of FTZ 46, submitted a notification of proposed production activity to the FTZ Board for its facility located in Mason, Ohio. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on July 22, 2015.

The Festo facility is located within Site 9 of FTZ 46. The facility is used for the production of pneumatic and electronic cylinders and drives, valve manifolds, and electronic control systems used for industrial automation applications. Pursuant to 15 CFR 400.14(b), FTZ authority would be limited to the specific foreign-status components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Festo from customs duty payments on the foreign status components used in export production. On its domestic sales, Festo would be able to choose the duty rate during customs entry procedures that applies to pneumatic and electric cylinders and drives, valve manifolds, and electronic control systems (duty rates ranges from free to 2.7%) for the foreign status components noted below. Customs duties also could possibly be deferred or reduced on foreign status production equipment.
