

incorporated in a Scoping Report and were considered in the preparation of this Draft EIS.

Concerns raised during scoping include: potential degradation of surface water or groundwater quality and potential depletion to groundwater from pit lakes and/or water withdrawals for mine operations; potential impacts to mule deer habitat and migration corridors; potential impacts to greater sage-grouse habitat and strutting grounds; potential impacts to Wild Horse Herd Management Areas (HMAs), including herd access to surface water sources; potential air quality impacts from fugitive dust containing mercury, arsenic, or other contaminants; and potential impacts to visual resources including the visual setting of the Pony Express Trail and the Ruby Lake National Wildlife Refuge. The North and South Operations Area Facilities Reconfiguration Alternative was developed to help reduce impacts to mule deer, greater sage-grouse, and visual resources. The Western Redbird Modification Alternative was developed to help further reduce impacts to mule deer. Mitigation measures have also been included to show how impacts on resources could be minimized.

The BLM has prepared the Draft EIS in conjunction with its five Cooperating Agencies: Nevada Department of Wildlife, U.S. Fish and Wildlife Service, State of Nevada Sagebrush Ecosystem Program, Eureka County, and White Pine County.
