Raisins under a marketing order have to meet certain requirements set forth in the grade standards. In addition, raisins are subject to section 8e import requirements under the Agricultural Marketing Act of 1937, as amended (7 U.S.C. 601–674), which requires imported raisins to meet grade, size, and quality under the applicable marketing order (7 CFR part 999).

Background

AMS continually reviews all fruit and vegetable grade standards to ensure their usefulness in the industry, and to modernize language and remove duplicative terminology. On May 13, 2013, AMS received a petition from the Little People of America stating that they “are trying to raise awareness around and eliminate the use of the word midget.” The petition further stated that, “Though the use of the word midget by the USDA when classifying certain food products is benign, Little People of America, and the dwarfism community, hopes that the USDA would consider phasing out the term midget.”

AMS determined that the processed raisin grade standard contained “small or midget” terminology for the same requirement. Before developing these proposed revisions, AMS solicited comments and suggestions about the grade standards from the RAC. The RAC represents the entire California raisin industry; no other state produces raisins commercially. On August 14, 2014, the RAC approved the removal of the term midget from the standards.

AMS is proposing to remove five references to the term “midget” in the following sections: 52.1845(b) and (c), 52.1850(a)(2) and (a)(3), and Table I. The proposed revisions would modernize and help clarify the language of the standard by removing dual terminology for the same requirement.

The proposed rule provides a 60-day period during which interested parties may comment on the revisions to the standard.
