If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, "Requests to Agreement States for Information." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 27, 2015 (80 FR 23306).

1. *The title of the information collection:* Requests to Agreement States for Information.

2. *OMB approval number:* 3150-0029.

3. *Type of submission:* Revision.

4. *The form number if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion.

6. *Who will be required or asked to respond:* Thirty-Seven Agreement States who have signed Section 274(b) Agreements with the NRC.

7. *The estimated number of annual responses:* 421.8 responses.

8. *The estimated number of annual respondents:* 37.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 3,374.4 hours.

10. *Abstract:* The NRC is seeking to revise this information collection to be a plan for a generic collection of information. The need and practicality of the collection can be evaluated, but the details of the specific individual collections will not be known until a later time. The Agreement States will be asked on a one-time or as-needed basis to respond to a specific incident, to gather information on licensing and inspection practices or other technical information. The results of such information requests, which are authorized under Section 274(b) of the Atomic Energy Act, will be utilized in part by the NRC in preparing responses to Congressional inquiries.

Dated at Rockville, Maryland, this 17th day of August 2015.

II. Discussion

On May 29, 2015, the NRC requested comments on draft NUREG–0654/FEMA–REP–1, Revision 2, “Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants.” Comments on the draft document were also requested by FEMA on the same date (80 FR 30697). The public comment period was originally scheduled to close on August 27, 2015. On June 23, 2015, the Nuclear Energy Institute submitted a request to the NRC and FEMA to extend the public comment period an additional 90 days (ADAMS Accession No. ML15205A187). The NRC, in conjunction with FEMA, has decided to extend the public comment period on this document until October 13, 2015, to allow more time for members of the public to submit their comments. This represents a 45-day

extension, rather than 90 days as requested, in consideration of the extensive public outreach and stakeholder engagement throughout the development of the draft document, which provided opportunities for reviewing and providing feedback on preliminary versions of the document. A 45-day extension should provide sufficient additional time for comments to be provided.

Dated at Rockville, Maryland, this 13th day of August, 2015.

For the U.S. Nuclear Regulatory Commission.

Brian E. Holian,

Director, Office of Nuclear Security and Incident Response.
