⁵ The estimates for cost per response are derived using the following formula: Average Burden Hours per Response * \$72.00 per Hour = Average Cost per Response. The hourly cost figure comes from the FERC average salary (\$149,489/year). Commission staff believes the FERC average salary to be representative wage for industry respondents.

SUPPLEMENTARY INFORMATION:

Public Comment

The draft general permit contains technology-based effluent limitations, administrative and monitoring requirements, as well as other standard conditions, prohibitions, and management practices. A fact sheet has been prepared which sets forth the principle factual, legal, policy, and scientific information considered in the development of the draft general permit. Copies of the draft general permit, fact sheet, Biological Evaluation, Essential Fish Habitat Assessment, and Ocean Discharge Criteria Evaluation are

available online at <http://www.epa.gov/r10earth/waterpermits.htm> (click on draft permits, then Oregon and Washington), at the EPA Region 10 headquarters at the address listed above any time between 8:30 a.m. and 4:00 p.m., Monday through Friday, or mailed upon request. Interested persons may submit written comments to the attention of Lindsay Guzzo at the address above. All comments must include the name, address, and telephone number of the commenter, a concise statement of comment and the relevant facts upon which it is based. Comments of either support or concern which are directed at specific, cited permit requirements are appreciated.

After the expiration date of the Public Notice on October 8, 2015, the Director, Office of Water and Watersheds, EPA Region 10, will make a final determination with respect to issuance of the general permit. The proposed requirements contained in the draft general permit will become final upon issuance if no significant comments are received during the public comment period.

Public Hearing

Persons wishing to request a public hearing should submit their written request by October 8, 2015 stating the nature of the issues to be raised as well as the requester's name, address and telephone number to Lindsay Guzzo at the address above. Notice will also be posted on the Region 10 Web site, and will be mailed to all interested persons receiving letters of the availability of the draft permit.

Endangered Species Act

Section 7 of the Endangered Species Act (ESA), 16 U.S.C. 1531-1544, requires federal agencies to consult with the National Marine Fisheries Service

(NMFS) and the U.S. Fish and Wildlife Service (USFWS) if their actions have the potential to either beneficially or adversely affect any threatened or endangered species. To address these ESA requirements, and in support of the EPA's informal consultation with the Services, a Biological Evaluation (BE) was prepared to analyze these potential effects. The results of the BE concluded that discharges from Offshore Seafood Processing facilities will either have *no effect* or are *not likely to adversely affect* threatened or endangered species in the vicinity of the discharges. The fact sheet, the draft permits and the BE are being sent to the Services for review of consistency with those programs established for the conservation of endangered and threatened species. Any additional comments or conservation recommendations received from the Services regarding threatened or endangered species will be considered prior to issuance of the general permit.

Magnuson-Stevens Fishery Conservation and Management Act Section 305(b) of the Magnuson-Stevens Act [16 U.S.C. 1855(b)] requires federal agencies to consult with NOAA Fisheries when any activity proposed to be permitted, funded, or undertaken by a federal agency may have an adverse effect on designated Essential Fish Habitat (EFH) as defined by the Act. To address the requirements of the Magnuson-Stevens Act, the EPA prepared an EFH Assessment concluding that offshore seafood processors operations may adversely affect essential fish habitat. However, the EPA expects that effects on essential fish habitat, while possible, are likely to be limited in extent for several reasons. For more information please see the Biological Evaluation/EFH assessment. Any additional comments or conservation recommendations received from NOAA Fisheries regarding EFH will be considered prior to issuance of the general permit.

Executive Order 12866

The Office of Management and Budget (OMB) exempts this action from the review requirements of Executive Order 12866 pursuant to Section 6 of that order.

Paperwork Reduction Act

The EPA has reviewed the requirements imposed on regulated facilities in the draft general permit and finds them consistent with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.*, a federal agency must prepare an initial regulatory flexibility analysis "for any proposed rule" for which the agency "is required by section 553 of the Administrative Procedure Act (APA), or any other law, to publish general notice of proposed rulemaking." The RFA exempts from this requirement any rule that the issuing agency certifies "will not, if promulgated, have a significant economic impact on a substantial number of small entities." The EPA has concluded that NPDES general permits are permits, not rulemakings, under the APA and thus not subject to APA rulemaking requirements or the FRA.

Abstract: Transportation conformity is required under Clean Air Act section 176(c) (42 U.S.C. 7506(c)) to ensure that federally supported transportation activities are consistent with the purpose of the State Air Quality Implementation plan (SIP). Transportation activities include transportation plans, Transportation Improvement Programs (TIPs), and federally funded or approved highway or transit projects. Conformity to the purpose of the SIP means that transportation activities will not cause or contribute to new air quality violations, worsen existing violations, or delay timely attainment of the relevant National Ambient Air Quality Standards (NAAQS) or interim milestones. Transportation conformity applies under EPA's conformity regulations at
