

300-foot anchor segment extending landward from the toe of the primary dune. The groin would also include a 120-ft-long shore-parallel T-Head segment centered on the seaward terminus of the main stem designed to prevent flanking. This is expected to have more of a stabilizing effect on the shoreline and minimize formation of potential offshore rip currents and sand losses during extreme wave conditions.

The seaward section of the groin would be constructed with loosely placed 4- to 5-ft-diameter granite armor stone to facilitate the movement of sand past the structure, and would have a crest width of ~5 ft and a base width of ~40 ft, while the underlying geo-textile base layer would have a slightly greater width of ~45 ft. The shore anchorage segment would be entirely buried at the completion of groin construction and would remain buried so long as the position of the MHW line remains seaward of the initial post-construction primary dune line. The intermediate groin would be designed to be a relatively low-profile structure to maximize sand overpassing and to minimize impacts to beach recreation and aesthetics.

The proposed terminal groin is one of four such structures approved by the General Assembly to be constructed in North Carolina following passing of Senate Bill (SB) 110. The U.S. Army Corps of Engineers (USACE) determined that there is sufficient information to conclude that the project would result in significant adverse impact on the human environment, and has prepared a DEIS pursuant to the National Environmental Policy Act (NEPA) to evaluate the environmental effects of the alternatives considering the project's purpose and need. The purpose and need of the proposed Holden Beach East End Shore Protection Project is to provide shoreline protection that would mitigate ongoing chronic erosion on the eastern portion on the Town's oceanfront shoreline so as to preserve the integrity of its public infrastructure, provide protection to existing development, and ensure the continued public use of the oceanfront beach along this area.

2. *Issues.* There are several potential environmental and public interest issues that are addressed in the DEIS. Public interest issues include, but are not limited to, the following: public safety, aesthetics, recreation, navigation, infrastructure, economics, and noise pollution. Additional issues may be identified during the public review process. Issues initially identified as potentially significant include:

a. Potential impacts to marine biological resources (burial of benthic organisms, passageway for fish and other marine life) and Essential Fish Habitat.

b. Potential impacts to threatened and endangered marine mammals, reptiles, birds, fish, and plants.

c. Potential for effects/changes to Holden Beach, Oak Island, Lockwood Folly inlet, and the AIWW respectively.

d. Potential impacts to navigation.

e. Potential effects on federal navigation maintenance regimes, including the Federal project.

f. Potential effects of shoreline protection.

g. Potential impacts on public health and safety.

h. Potential impacts to recreational and commercial fishing.

i. Potential impacts to cultural resources.

j. Potential impacts to future dredging and nourishment activities.

3. *Alternatives.* Six alternatives are being considered for the proposed project. These alternatives, including the No Action alternative, were further formulated and developed during the scoping process and are considered in the DEIS. A summary of alternatives under consideration are provided below:

a. Alternative 1—No Action (Continue Current Management Practices);

b. Alternative 2—Abandon and Retreat;

c. Alternative 3—Beach Nourishment Only;

d. Alternative 4—Inlet Management and Beach Nourishment;

e. Alternative 5—Short Terminal Groin with Beach Nourishment;

f. Alternative 6—Intermediate

Terminal Groin with Beach Nourishment/Applicants Preferred Alternative.

4. *Scoping Process.* Project Review Team meetings were held to receive comments and assess concerns regarding the appropriate scope and preparation of the DEIS. Federal, state, and local agencies and other interested organizations and persons participated in these Project Review Team meetings.

The Corps will initiate consultation with the United States Fish and Wildlife Service pursuant to the Endangered Species Act and the Fish and Wildlife Coordination Act. The Corps will also consult with the National Marine Fisheries Service pursuant to the Magnuson-Stevens Act and Endangered Species Act. The Corps will coordinate with the State Department of Cultural Resources pursuant to Section 106 of the National Historic Preservation Act.

Potential water quality concerns will be addressed pursuant to Section 401 of

the Clean Water Act through coordination with the North Carolina Divisions of Coastal Management (DCM) and Water Resources (DWR). This coordination will ensure consistency with the Coastal Zone Management Act and project compliance with water quality standards. The Corps has coordinated closely with DCM in the development of the DEIS to ensure the process complies with State Environmental Policy Act (SEPA) requirements, as well as the NEPA requirements. The DEIS has been designed to consolidate both NEPA and SEPA processes to eliminate duplications.

5. *Availability of the DEIS.* The DEIS has been published and circulated. The DEIS for the proposal can be found at the following link: <http://www.saw.usace.army.mil/Missions/RegulatoryPermitProgram/MajorProjects> under Holden Beach Terminal Groin—Corps ID # SAW-2011-01914. The public is invited to attend, and/or comment at, a public hearing to be held at the Holden Beach Town Hall, located at 110 Rothschild St, Holden Beach, NC 28462, on September 24, 2015 at 6:00 p.m.

Dated: August 21, 2015.

## DEFENSE NUCLEAR FACILITIES SAFETY BOARD

### Sunshine Act Notice

**AGENCY:** Defense Nuclear Facilities Safety Board.

**ACTION:** Hearing and meeting notice; correction.

**SUMMARY:** The Defense Nuclear Facilities Safety Board (Board) published a notice in the **Federal Register** of July 27, 2015, (80 FR 44335), concerning a two-session public hearing and meeting on August 26, 2015, at the Three Rivers Convention Center, 7016 West Grandridge Boulevard, Kennewick, Washington 99352. The Board amends that notice as set forth below to postpone the Session II open meeting and supplement the Session I hearing.

**CONTACT PERSON FOR MORE INFORMATION:** Mark Welch, General Manager, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue NW., Suite 700, Washington, DC 20004-2901, (800) 788-4016. This is a toll-free number.

**Correction**

In the **Federal Register** of July 27, 2015, in FR Doc. 2015–18405, on page 44335, correct the notice by postponing the Session II open meeting portion of the proceeding due to the health reasons of a Board Member. It is expected the Session II open meeting will be rescheduled and separately noticed at some point in the future. The Session I hearing portion of the proceeding will proceed as originally scheduled to convene at 5:00 p.m. in accordance with a revised agenda. The July 25, 2015, notice should be supplemented in the “Matters To Be Considered” section, in the second column, beginning on line 16, after the word “progress.”, with the following additional information from the revised agenda concerning the hearing portion of the proceeding: “The Board will then receive testimony from a senior Board technical staff employee concerning the Board staff’s perspective on the status of DOE’s execution of the Implementation Plan for Board Recommendation 2011–1, corrective actions taken in response to Board Recommendation 2011–1 at WTP, and the results from the extent of condition reviews conducted by DOE.”

Dated: August 25, 2015.

**Joyce L. Connery,**  
Chairman.

**DEPARTMENT OF EDUCATION**

[Docket No.: ED–2015–ICCD–0108]

**Agency Information Collection Activities; Comment Request; High School Longitudinal Study of 2009 (HSLs:09) Second Follow-up Main Study and 2018 Panel Maintenance**

**AGENCY:** National Center for Education Statistics (NCES), Department of Education (ED).

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a revision of an existing information collection.

**DATES:** Interested persons are invited to submit comments on or before October 27, 2015.

**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2015–ICCD–0108. Comments submitted in response to this notice should be

submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E105, Washington, DC 20202–4537.

**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Kashka Kubzdela, (202) 502–7411.

**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public’s reporting burden. It also helps the public understand the Department’s information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

**Title of Collection:** High School Longitudinal Study of 2009 (HSLs:09) Second Follow-up Main Study and 2018 Panel Maintenance.

**OMB Control Number:** 1850–0852.

**Type of Review:** A revision of an existing information collection.

**Respondents/Affected Public:** Individuals.

**Total Estimated Number of Annual Responses:** 32,107.

**Total Estimated Number of Annual Burden Hours:** 24,904.

**Abstract:** The High School Longitudinal Study of 2009 (HSLs:09) is a nationally representative, longitudinal study of more than 20,000 9th graders in 944 schools in 2009 who are being followed through their secondary and postsecondary years. The study focuses on understanding students’ trajectories from the beginning of high school into postsecondary education or the workforce and beyond. What students decide to pursue when, why, and how are crucial questions for HSLs:09, especially, but not solely, in regards to science, technology, engineering, and math (STEM) courses, majors, and careers. To date, HSLs:09 measured math achievement gains in the first 3 years of high school and, like past studies, surveyed students, their parents, school administrators, school counselors, and teachers. After the initial 2009 data collection, the main study students were re-surveyed in 2012 when most were high school 11th-graders, and again in 2013 when most had just graduated from high school. The second follow-up data collection will take place in early 2016, and will consist of a survey, postsecondary transcript collection, financial aid records collection, and file matching to extant data sources. The second follow-up focuses on postsecondary attendance patterns, field of study selection processes with particular emphasis on STEM, the postsecondary academic and social experience, education financing, employment history including instances of unemployment and underemployment, job characteristics including income and benefits, job values, family formation, and civic engagement. The HSLs:09 data elements are designed to support research that speaks to the underlying dynamics and education processes that influence student achievement, growth, and personal development over time. This request is to conduct the HSLs:09 Second Follow-up Main Study interviews in 2016, the transcript and student financial aid records collections in 2017, and panel maintenance activities in 2018.

Dated: August 25, 2015.
