

III. Proposed Actions

The Agency is requesting an adjustment decrease of 216,744 burden hours (from 1,460,430 to 1,243,686 burden hours). There is also an estimated increase in operation and maintenance costs of \$6,849,923, from \$60,093,015 to \$66,942,938. The increase in operation and maintenance costs is mainly due to the increased cost of lab analysis of samples and the increase in cost of the monitoring equipment.

SUPPLEMENTARY INFORMATION:

I. Introduction

By letter dated March 18, 2015 (ADAMS Accession No. ML15077A495), GEH submitted to the NRC a revised license renewal application for the Vallecitos Nuclear Center, located near Sunol, California. Special Nuclear Material License No. SNM–960 authorizes GEH to conduct laboratory analysis and engineering studies of licensed material and to store onsite material previously used in analysis. The request, if granted, would authorize GEH to continue licensed activities at the Vallecitos Nuclear Center for 10 years.

The current license expired on June 30, 2010. Because GEH filed an original renewal application on September 30, 2009, and subsequent revisions, the license is under timely renewal as

provided in 10 CFR 2.109(a). The revised license renewal application submitted on March 18, 2015, supersedes previous license renewal applications submitted to the NRC.

An NRC administrative review, documented in a letter to GEH dated May 1, 2015 (ADAMS Accession No. ML15077A406), found the March 18, 2015, renewal application acceptable to begin a formal technical review. If the NRC approves the request, the approval will be documented in NRC License No. SNM–960. However, before approving the request, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the NRC’s regulations. These findings will be documented in a Safety Evaluation Report. Because the licensed material will be used in research and development, renewal of SNM–960 is an action that is categorically excluded from the requirement to prepare an environmental assessment pursuant to 10 CFR 51.22(c)(14)(v).

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person(s) whose interest may be affected by this action may file a request for a hearing and a petition to intervene with respect to the revised license renewal application. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the NRC’s “Agency Rules of Practice and Procedure” in 10 CFR part 2. Interested person(s) should consult a current copy of 10 CFR 2.309, which is available at the NRC’s PDR, located in One White Flint North, Room O1–F21 (first floor), 11555 Rockville Pike, Rockville, Maryland 20852. The NRC’s regulations are accessible electronically from the NRC Library on the NRC’s Web site at <http://www.nrc.gov/reading-rm/doc-collections/cfr/>. If a request for a hearing or petition for leave to intervene is filed within 60 days, the Commission or a presiding officer designated by the Commission or by the Chief Administrative Judge of the Atomic Safety and Licensing Board Panel will rule on the request and/or petition. The Secretary or the Chief Administrative Judge of the Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.309, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted,
