The order in which agenda items are addressed may change. The meetings will run as late as necessary to complete scheduled business.

Although non-emergency issues not contained in this agenda may come up at the meeting for discussion, those issues may not be the subject of formal action during the meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the intent to take final action to address the emergency.

#### Western Pacific Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of a public meeting.

**SUMMARY:** The Western Pacific Fishery Management Council (Council) will convene a half-day meeting on Friday, September 25, 2015 regarding social, economic, ecological, and management uncertainty (SEEM) factors pertinent to

setting annual catch limits (ACLs) for bottomfish fisheries in American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands.

**DATES:** The meeting will be held on Friday, September 25, 2015, starting at 1 p.m. Hawaii Standard Time.

**ADDRESSES:** The meeting will be held at the Council office, 1164 Bishop St., 14th Floor, Honolulu, HI 96813 and via teleconference; conference telephone: (808) 522-3560.

**FOR FURTHER INFORMATION CONTACT:** Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council; telephone: (808) 522-8220.

#### SUPPLEMENTARY INFORMATION:

#### Agenda

*Friday, September 25, 2015*

Following introductions, participants will review the overfishing limit for territorial bottomfish fisheries and the results of risk analyses that considered quality of the stock assessment, uncertainty characteristics, stock status, and productivity and susceptibility. Participants will then discuss social, economic, ecological, and management uncertainty factors relevant to these fisheries that may warrant the Council to consider additional catch limit reductions. Finally, individuals will score these factors and these scores will be averaged in order to reach consensus on a recommendation to the Council.

#### Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds (see **ADDRESSES**) at least 5 days prior to the meeting date.

Dated: September 2, 2015.

#### SUPPLEMENTARY INFORMATION:

The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data/Assessment Workshop is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.
