

Need and Proposed Use of the Information: HRSA will use the proposed information to demonstrate program accountability and continuously monitor and provide oversight to Home Visiting Program grantees. The information will also be used to provide quality improvement guidance and technical assistance to grantees and help inform the development of early childhood systems at the national, state, and local level. HRSA is seeking to collect demographic, service utilization, and select clinical indicators for participants enrolled in home visiting services. In addition, HRSA will collect a set of standardized performance and outcome indicators that correspond with the statutorily identified benchmark areas.

Demographic, Service Utilization, and Clinical Indicators Data

These data will describe the population served by the MIECHV Program, including the unduplicated count of the number of participants and participant groups by primary insurance coverage. These data will provide other socio-demographic characteristics of program participants and their utilization of services, such as program

retention. Additionally, these data will describe several select clinical indicators of program participants, such as the percent of eligible participants who deliver their child preterm. This information will be collected from participants once, at enrollment in home visiting services and aggregated and reported to HRSA by state/territory grantees once annually.

Performance and Outcome Benchmark Data

These data constitute a discrete set of standardized performance and outcome indicators that correspond with the statutorily identified benchmark areas. These data will provide aggregate totals, percentages, and rates for performance and outcome indicators that are salient to the MIECHV Program, home visiting services more generally, and the at-risk populations served. These data will be collected from participants based on the appropriate measurement period defined for each measure and aggregated and reported to HRSA by state/territory grantees once annually.

This information will be used to demonstrate accountability with legislative and programmatic requirements. It will also be used to

monitor and provide continued oversight for grantee performance and to target technical assistance resources to grantees. In the future, it is anticipated the MIECHV funding decisions may be allocated based on grantee performance, including on benchmark performance areas.

Likely Respondents: Home Visiting Program grantees.

This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.
