

the records that is compatible with the purpose for which the records were collected;

(6) To USDA contractors, partner agency employees or contractors, or private industry employed to identify patterns, trends, or anomalies indicative of fraud, waste, or abuse. Such contractors and other parties are bound by the nondisclosure provisions of the Privacy Act; and

(7) To the National Archives and Records Administration or to the General Services Administration for records management inspections conducted under 44 U.S.C. 2904 and 2906.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The electronic master data for the ADTIS are stored on USDA servers in secure facilities at two separate locations. This redundancy ensures around-the-clock operations. All servers for the ADTIS are backed up nightly. Backup media is taken weekly to an offsite storage facility and stored on tape.

RETRIEVABILITY:

Data can be retrieved by identification number assigned to premises, premises address, and name of contact person for the premises if provided by the State or Tribe, name of non-producer participant, non-producer participant number, and official animal identification numbers.

SAFEGUARDS:

The electronic master data for the ADTIS is stored on USDA servers in secure facilities. The computer room has safeguards that limit physical access. Access to data is limited to users who have Level 2 eAuthentication credentials and/or database authentication. User roles further limit access to data, and the application contains security measures to prevent access to unauthorized information. USDA monitors eAuthentication access to ensure authorized and appropriate use of data.

RETENTION AND DISPOSAL:

APHIS will maintain records in the system indefinitely while the records schedule is awaiting approval. The qualifier is supported under 36 CFR 120.18.

SYSTEM MANAGER(S) AND ADDRESS:

Program Manager, Animal Disease Traceability, VS, APHIS, 4700 River Road Unit 46, Riverdale, MD 20737-1231; (301) 851-3539.

NOTIFICATION PROCEDURE:

Any individual may request general information regarding this system of records or information as to whether the system contains records pertaining to him/her from the system manager at the address above. All inquiries pertaining to this system should be in writing, must name the system of records as set forth in the system notice, and must contain the individual's name, telephone number, address, and email address.

RECORD ACCESS PROCEDURES:

Any individual may obtain information from a record in the system that pertains to him or her. Requests for hard copies of records should be in writing, and the request must contain the requesting individual's name, address, name of the system of records, timeframe for the records in question, any other pertinent information to help identify the file, and a copy of his/her photo identification containing a current address for verification of identification. All inquiries should be addressed to the Freedom of Information and Privacy Act Staff, Legislative and Public Affairs, APHIS, 4700 River Road Unit 50, Riverdale, MD 20737-1232.

CONTESTING RECORD PROCEDURES:

Any individual may contest information contained within a record in the system that pertains to him/her by submitting a written request to the system manager at the address above. Include the reason for contesting the record and the proposed amendment to the information with supporting documentation to show how the record is inaccurate.

RECORD SOURCE CATEGORIES:

Information in the ADTIS comes from members of the public, either individuals or businesses, involved in or supporting the production, management, or holding of livestock or poultry.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

DEPARTMENT OF AGRICULTURE

Forest Service

Sequoia National Forest, California; Summit Fuels Reduction and Forest Health Project

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Sequoia National Forest (SQF) is planning to prepare an environmental impact statement (EIS) to document and publicly disclose the environmental effects of implementing a fuels reduction and forest health project within a 10,600 acre project analysis area. The Summit Fuels Reduction and Forest Health Project (Summit Project) will encourage a healthy and diverse forest ecosystem that is more resilient to the effects of wildfire, drought, disease, and other disturbances. The Summit Project is located in the wildland-urban intermix (WUI) of the Greenhorn Mountains on the Kern River Ranger District of Sequoia National Forest, surrounding the Alta Sierra community in Kern County, California. The Summit Project is located in Township 25 South, Ranges 31 and 32 East, Mount Diablo Base and Meridian.

DATES: Comments concerning the scope of the analysis must be received by September 16, 2015. The draft environmental impact statement is expected January 2016 and the final environmental impact statement is expected June 2016.

ADDRESSES: Send written comments to Kern River Ranger District, Attention: Summit Comments, P.O. Box 9, Kernville, CA 93238. Comments may also be sent via email to comments-pacificsouthwest-sequoia@fs.fed.us, or via facsimile to (760) 376-3795.

FOR FURTHER INFORMATION CONTACT: Steve Anderson, Kern River Ranger District, P.O. Box 9 (105 Whitney Road), Kernville, CA 93238 at 760-376-3781.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Rely Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m. Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Action

The purpose of the project is to provide defensible space around the community of Alta Sierra and nearby structures, improve forest health and provide for ecological restoration. There is a need to reduce fuels to protect the private properties of the Alta Sierra community and adjacent forest special

uses including the recreation residence tracts of El Monte, Greenhorn Summit, Kern Park, Shirley Meadows, Slick Rock, and Weeping Springs; the Shirley Meadow ski resort; communication facilities at Cooks Peak; and power transmission lines; as well as protecting the forest and wildlife habitat from large-scale, severe wildfire effects. Fuels reduction will provide forest and fuel structure that allows for safe use of managed fire for resource benefit and forest health; and reduce the risks to firefighting personnel and the public. There is a need to restore the forest ecosystem by accelerating development of mature forest conditions including large tree forest structure; by re-introducing a fire regime that can be safely managed; by improving wildlife habitat; shifting tree species composition towards historic fire- and drought-adapted oak and pine dominance while reducing fire- and drought-intolerant fir and cedar; and changing stand structure to restore natural heterogeneity and resilience to disturbance events. Sustained yield of timber and other forest by products remains as part of the multiple-use mission of the Forest Service. However, fuels reduction, ecological restoration and movement toward the desired conditions identified in the Sierra Nevada Forest Plan Amendment are the driving influences that will dictate the end result, with an emphasis on “what is left behind” rather than “what is taken.” Timber harvest may be used as a tool to improve efficiency and reduce overall costs while moving the forest toward the desired conditions.

Proposed Action

The proposed action will create defensible space near communities in the WUI defense zones; establish and maintain a pattern of area treatments that can be effective in modifying wild fire behavior in the WUI threat zones; and result in economically efficient treatments to reduce hazardous fuels.

The Summit Project proposes a combination of prescribed fire, hand or mechanical thinning to reduce ladder fuels and the potential for crown fire while increasing forest resilience. Thinning may include commercial timber harvest within the 2,500 acre proposed treatment areas. It is expected that the timber sale volume would be less than 5,000 CCF. The proposed treatment areas include salvage harvest of hazard trees of any size as well as dead and dying trees; commercial harvest, using ground skidding, skyline or helicopter yarding of trees smaller than 30 inches diameter at breast height (dbh); and hand thinning, mastication,

chipping or other fuels treatments. Treatments will vary based on slopes, ground conditions, access and other factors. Prescribed fire would be introduced within the project analysis area to reduce surface fuels and promote natural regeneration. Areas selected for thinning or mastication would favor Jeffrey and sugar pines, oak, and other shade intolerant, fire and drought tolerant species, to restore the historic species composition. Large snags and woody debris would be strategically retained for wildlife habitat. Riparian areas and meadows would be protected. Implementation would begin after completion of the environmental review process, estimated in 2016, and would be completed over a 5–10 year period.

Possible Alternatives

In addition to the proposed action, the EIS will evaluate a no action alternative. An alternative will be developed that applies only non-commercial treatments to achieve the purpose and need. The *Draft Interim Recommendations for the Management of California Spotted Owl Habitat on National Forest System Lands 29 May 2015* will be included and analyzed in an alternative as well. Other alternatives may be identified through the interdisciplinary process and public participation.

Responsible Official

The responsible official is Alfred W. Watson, District Ranger, Sequoia National Forest, P.O. Box 9, Kernville, CA 93238.

Nature of Decision To Be Made

The responsible official will decide whether to adopt and implement the proposed action, an alternative to the proposed action, or take no action with respect to the Summit Fuels Reduction and Forest Health Project.

Scoping Process

This Notice of Intent initiates the scoping process which guides the development of the EIS. A public scoping meeting will be held on Saturday, October 3, 2015 starting at 10 a.m. at Greenhorn Mountains County Park on Old State Road in Alta Sierra. Detailed information on the meeting and proposed action, including maps, are available on the forest Web site at: <http://www.fs.usda.gov/project/?project=45951>. This project is included in the Sequoia National Forest's quarterly schedule of proposed actions (SOPA).

This project will follow the objection procedures as directed by 36 CFR 218 (A) and (B). The objection process provides an opportunity for members of

the public who have commented during opportunities for public participation to have any unresolved concerns receive an independent review by the Forest Service prior to a final decision being made by the responsible official. Only those who provided specific written comments during opportunities for public comment are eligible to file an objection.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including the names and addresses of those who comment, will be part of the public record on this proposed action. Comments submitted anonymously will be accepted and considered, however anonymous comments will not provide the Agency with the ability to provide the respondent with subsequent environmental documents.

Dated: September 9, 2015.

Alfred W. Watson,
District Ranger.

Forest Service

Shasta County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Shasta County Resource Advisory Committee (RAC) will meet in Redding, California. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. Additional RAC information, including the meeting agenda and the meeting summary/minutes can be found at the following Web site: www.fs.usda.gov/main/stnf/workingtogether/advisorycommittees.
